

AI Scribe Pilot Program: Clinician Consent Training Guide

This guide outlines the **consent requirements** and **training expectations** before you start using Tali AI Scribe within the Provincial EMR (CHR) in PEI. The consent training will review your **responsibilities** related to patient consent and documentation within the Provincial EMR. Your MOA/support staff must complete their specific consent training, please verify that it has been completed.

- All consent related resources (video and written materials) are available on the **Health PEI Staff Resource Centre**: <https://src.healthpei.ca/ai-scribe>.
- Before using the AI Scribe tool, **online 1:1 training with Tali AI** is required. Please email AI_Scribe_Support@ihis.org when you are ready to request your one-on-one training.

Resources to be Reviewed (Required)

- Patient Consent Video for Clinicians** (20 minutes) – Outlines consent requirements and reviews your role in requesting consent and documenting it in the Provincial EMR (CHR).
- Privacy Notice for Patients** – To be provided to all patients for their review before they are asked for consent (available in electronic Qnaire or paper format and in both English/French).
- Consent Scripts** – Must be followed when providing the paper format Privacy Notice to patients and requesting their consent for the use of AI Scribe.

Recommended Reading

- Clinician FAQs** – About AI scribes, how they work and the benefits to you and your patients.
- Patient FAQs** – Common questions and answers to help you address patient concerns.
- Resource Guide – Documenting Consent in the EMR** – Step-by-step instructions.
- Resource Guide – Tips and Tricks for Clinicians** – Gathered from PEI clinicians' feedback.

Readiness Checklist Before Using Tali

- ✓ **Watched** the Patient Consent Video for Clinicians – prepared to review consent documentation in the Provincial EMR (CHR) and know your responsibilities.
- ✓ **Read** the 'Privacy Notice for Patients' – able to answer patient questions about AI Scribes.
- ✓ **Read** the 'Consent Scripts' – understand when and how to use scripts with patients.
- ✓ **Completed Tali AI** one-on-one training session.
- ✓ **Reviewed** the 'Resource Guide – Documenting Consent in the Provincial EMR (CHR)' (recommended) - where to find the consent documentation & how to add the Data Point widget to the patient header.
- ✓ **Reviewed** the 'Patient FAQs' & 'Clinician FAQs' (recommended) – answer patient questions.
- ✓ **Viewed** the list of AI Scribe [printable resources](https://src.healthpei.ca/ai-scribe) for offices, clinic support staff and clinicians available on the Staff Resource Centre <https://src.healthpei.ca/ai-scribe>.
