

PATIENT SAFETY QUARTERLY REPORTS

Health PEI's Quality and Patient Safety Division prepares a **quarterly** patient safety report that is shared with the Quality and Safety Subcommittee of the Board and Health PEI's Executive Leadership Team.

WHAT INFORMATION IS INCLUDED?

The quarterly patient safety reports include information on:

Current trends related to patient safety incidents occurring at Health PEI, such as falls, medication, and behavioural incidents.

Actions and recommendations identified to mitigate risk of reoccurrence and promote safety.

All critical, severe, and never events (as outlined by Canadian Patient Safety Institute).

The reports **highlight organizational efforts** and **achievements aligned with patient safety goals**. The Board reviews these reports and provides feedback and support on initiatives.

QUESTIONS SURVEYORS MAY ASK STAFF:

How are safety trends monitored at Health PEI?

How are quarterly reports used to improve patient safety?

How is the Health PEI Board kept current regarding patient safety?
