

DID YOU KNOW?

Meet Firstline: A smarter way to take action against antimicrobial resistance

The Firstline app is a health technology platform designed to provide clinical guidance on infectious diseases, particularly focusing on antimicrobial stewardship. Firstline empowers providers to make better treatment decisions by providing fast access to local guidelines.

- 100% customized with Health PEI's antimicrobial guidelines for common infections, dosing information, antibiogram data, IPAC guidance, useful tools like IV to PO step down and Beta-Lactam allergy guidelines
- Easily accessible at the point of care across all clinical settings
- Free on iOS, Android and the web ([desktop icon](#) on all Health PEI computers)

- **Bookmark** guidelines that you use regularly
- To reduce scrolling, **search** for a word or phrase found anywhere in the documents
- Receive **notifications** when updates are made
- **Recent guideline updates:** Febrile Neutropenia, Pneumonia, Influenza, and COVID-19.
- **NEW under Useful Tools:** Stewardship Spotlight Education and penicillin allergy de-labeling tool
- **Coming soon:** Updates to Diabetic Foot Infection guideline

Get started with Firstline in less than 60 seconds

1. Download on mobile or access on the web
2. Click 'Select Location' and choose **Health PEI**
3. Instantly access local, tailored guidance to optimize patient outcomes and combat the spread of AMR
