

ATTENTION: ALL ENDUSERS

FALL TIME CHANGE
SUNDAY NOVEMBER 6TH
STARTING AT 0045 HRS

CORRECTION

With our latest code upgrade, we no longer require a scheduled downtime for the Fall time change. On November 6th, the Clinical Information System will remain operational; however there will be some impacts to external systems during the time change.

Starting at **0045hrs**, external systems such as the Client Registry (CR), Dragon dictation and Diagnostic Imaging RIS will be affected for approximately 1.5 hours. **Medication dispensing cabinets will be available but the information coming from CIS will be affected.** Please be aware that any patient information coming from or going to these systems will not appear until approximately 0115hrs, after the time change.
