

MONTHLY BULLETIN

ATTENTION: ALL FACILITIES

**UPDATES OCCURRING WITHIN THE CIS THE
WEEK OF - JUNE 25, 2018**

The following solution areas have updates:

Order Sets - Page 2

PowerChart, FirstNet & SurgiNet - Pages 2 - 3

Lab Updates - Page 4

UPCOMING EVENTS

There are no upcoming events in CIS.

Order Set Updates:

1. Modified! - ICU Tube Feeding Order Sets are now split into gastric and intestinal tube feeds and there are separate ones for PCH and QEH.
2. New! - Each of the four ICU Tube feeding Orders Sets will now contain a Feeding Tube Unclogging Subphase for occluded lines.
3. New! - Dexmedetomidine for Critically Ill Patients.
4. Updated! - ED ICU DKA Admit has been updated to reflect 2018 Clinical Guidelines.

PowerChart, FirstNet & SurgiNet Updates:

Change to Patient Lists: Room and Beds from ICU QEH and CCU QEH Nursing Units will be combined to ICU QEH

PowerChart, FirstNet & SurgiNet Updates: (continued)

Additional Discharge Instructions Order on Discharge Powerplans:

The screenshot shows a table of orders for a 'GENSURG Discharge (Initiated Pending)' patient. The 'Additional Discharge Information' order is selected. Below the table, the 'Details for Additional Discharge Information' section is visible, showing a text area for instructions (currently empty) and a 'Start Date/Time' field.

Component	Status	Details
GENSURG Discharge (Initiated Pending)		
Admit/Transfer/Discharge		
Discharge		Disposition: Discharged With Approval, Location: Home
<input checked="" type="checkbox"/> Additional Discharge Information		
<input checked="" type="checkbox"/> Discharge Instructions:		
<input type="checkbox"/> Follow up Appointment		with Primary Care Provider as necessary.
<input type="checkbox"/> Follow up Appointment		with Surgeon as necessary.

Orders Page - Related Results Opening Instead of View

The **Related Results** band will display and collapse the **View** band when an order has an associated related result. This is a safety feature to allow for quick review of related results. To return back to the **View** band, you must click on **View**.

The screenshot shows the 'Orders' page for a patient. A 'vancomycin' order is selected. On the left, the 'Related Results (2)' band is expanded, showing BUN and Creatinine Lvl results. The main order details for vancomycin are visible, including dose (250 mg), route (Oral), and frequency (q6hr).

View	Related Results (2)
<input type="checkbox"/>	BUN 11 10/11/2016 12:...
<input type="checkbox"/>	Creatinine Lvl 1.1 10/11/2016 12:...

Lab Updates :

Blood Bank Order Changes: Changes to CPOE ordering have been made in order to match the changes to the new Blood Bank requisitions.

New drop down - Mandatory fields for Prothrombin Complex Concentrate (Octaplex/Beriplex):

Details for BB Prothrombin Complex Concentrate (GEH) (Octaplex/ Beriplex (PCC) (GEH))

*Order priority: Stat

*Requested Start Date and Time: 2018-Jun-05 1442

*IU (int'l units) Required: []

Any Special Requirements: []

Special Instructions: INR 1.7-5.0=40mL(1000 IU)and 10mg Vit K INR to or greater than 5.1=80mL(2000...)

*PCC Indications: []

*INR: []

A new field (Transfusion Facility) - has been added to Red Cell or Crossmatch Orders. The facility default is based on the order (PCH Crossmatch Order defaults to PCH and QEH Crossmatch Order defaults to QEH). If the patient is to receive the red cells at another facility, the default must be changed to where the patient is receiving the transfusion.
