

MONTHLY BULLETIN

ATTENTION: ALL FACILITIES

**UPDATES OCCURRING WITHIN THE CIS THE
WEEK OF - OCTOBER 2ND, 2017**

The following solution areas have updates:

Provincial Drugs & Therapeutics (PD&T) - Page 2 (see attachment)

OrderSets - Page 2

PowerChart - Pages 3 - 6

PowerChart/FirstNet/SurgiNet - Page 7

UPCOMING EVENTS

The Dictaphone system is being replaced by a new solution called “eScripton” on October 17th.

Provincial Drugs & Therapeutics (PD&T) Update:

Please see attached memo regarding the addition of Basaglar (insulin glargine) to formulary.

Order Set updates:

VTE Prophylaxis Order Sets - Dalteparin will be removed as an option from all order sets containing VTE prophylaxis orders. VTE prophylaxis order sentences for enoxaparin have been previously expanded to include options for special patient populations (ie: renal impairment and obesity). A separate PD&T Communication will be distributed in October outlining the rationale for this change.

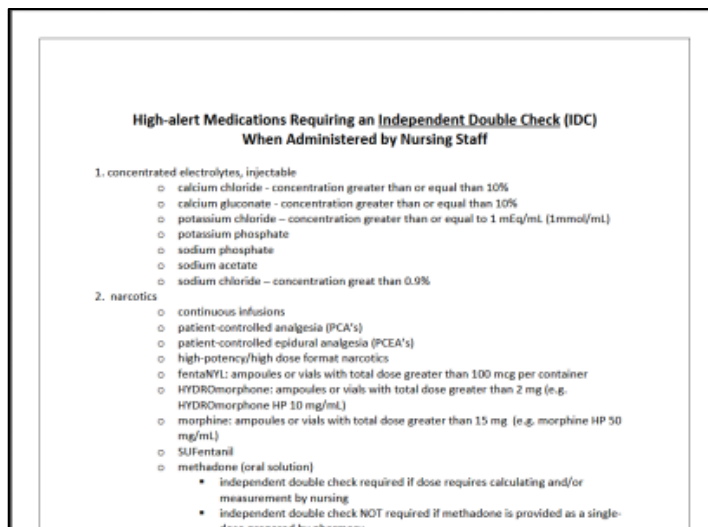

PowerChart Updates:

Changes related to the new High Alert Medication Policy:

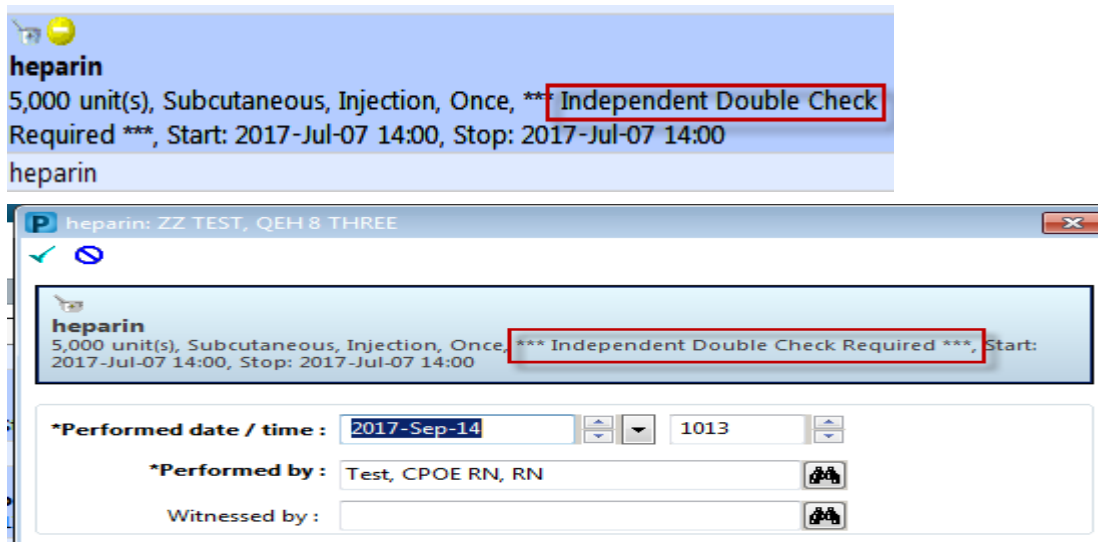

Health PEI has identified specific high-alert medications that require an independent double check.
(Please contact your Clinical Educator for more details)

The following updates have been made to the system to accommodate the new policy for High Alert Medications:

A new link icon referencing the medications requiring an independent double check will be located on the PC and SN toolbar. The link opens a document that identifies the medications that require an independent double check prior to administration.

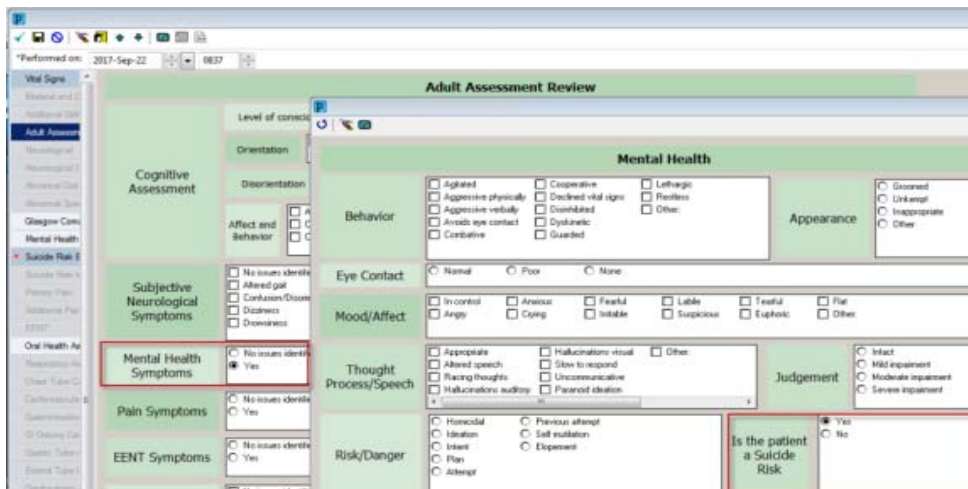

Changes to the MAR and Med Administration window

PowerChart Updates: (continued)

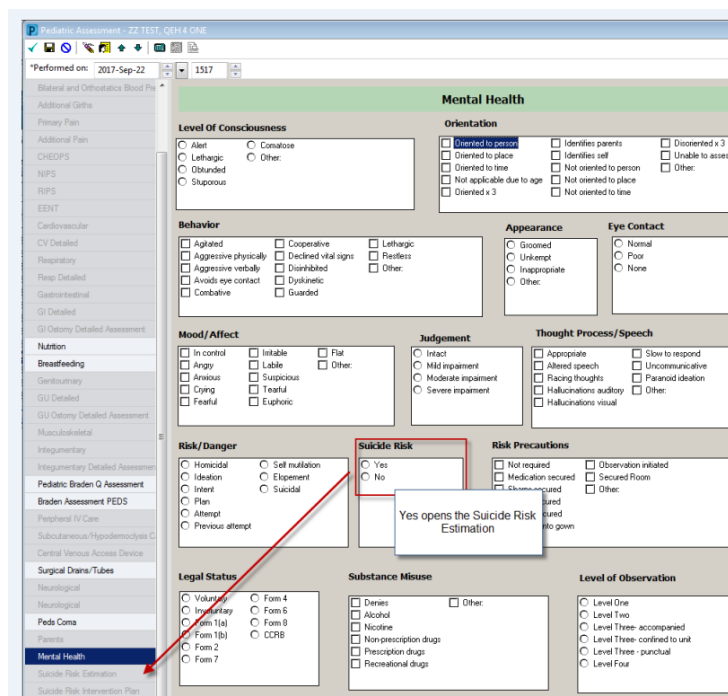

Update to the Adult and Pediatric Assessment forms Mental Health section:

Date of Last Attempt crosses any encounter being documented

Pediatric Assessment

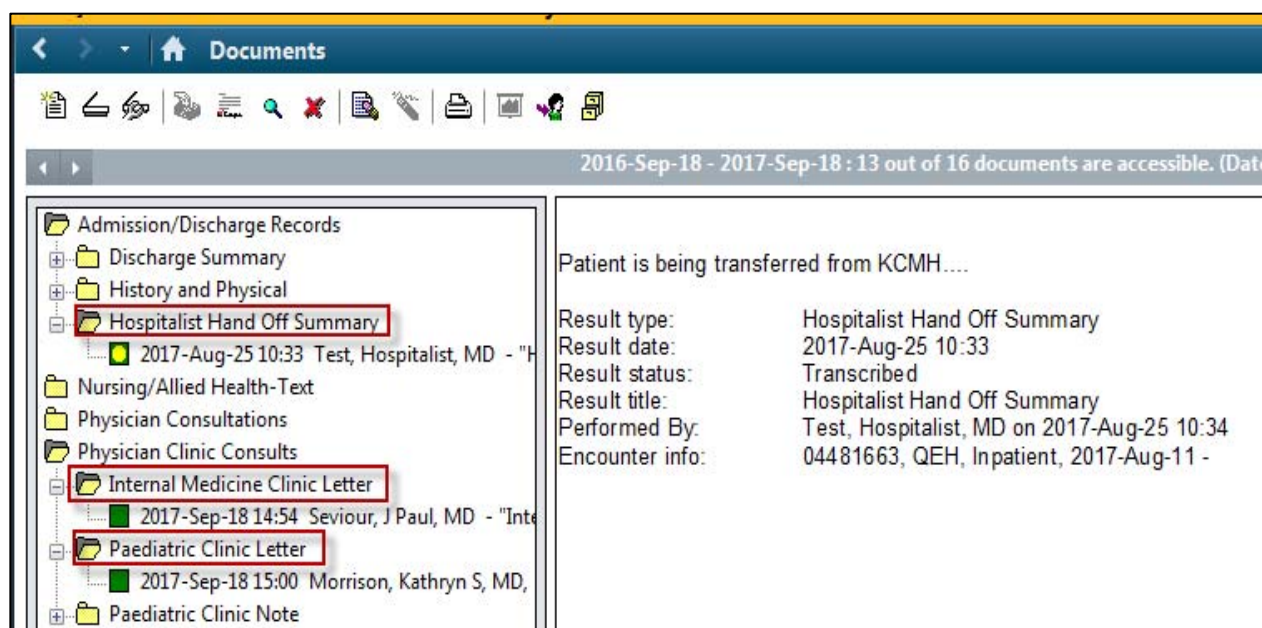

PowerChart Updates: (continued)

New Dictated Documents in CIS:

After the implementation of the eScripton Project, the following physician documents will be available in CIS:

1. **Hospitalist Hand Off Summary** under **Admission/Discharge Records**
2. **Internal Medicine Clinic Letter** under **Physician Clinic Consults**
3. **Paediatric Clinic Letter** under **Physician Clinic Consults**

We are merging several Nursing positions which have like functionality/security in the system:

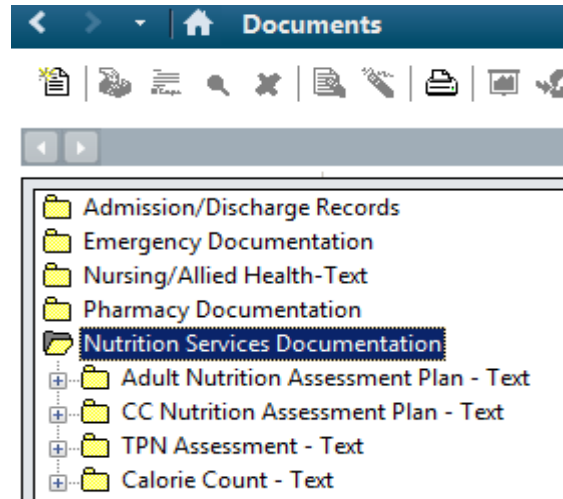

The only change staff will experience will be that there will no longer be a pop up for the Establishing a relationship box when you open a patient's chart. All the amalgamated positions will have the default relationship of Nurse.

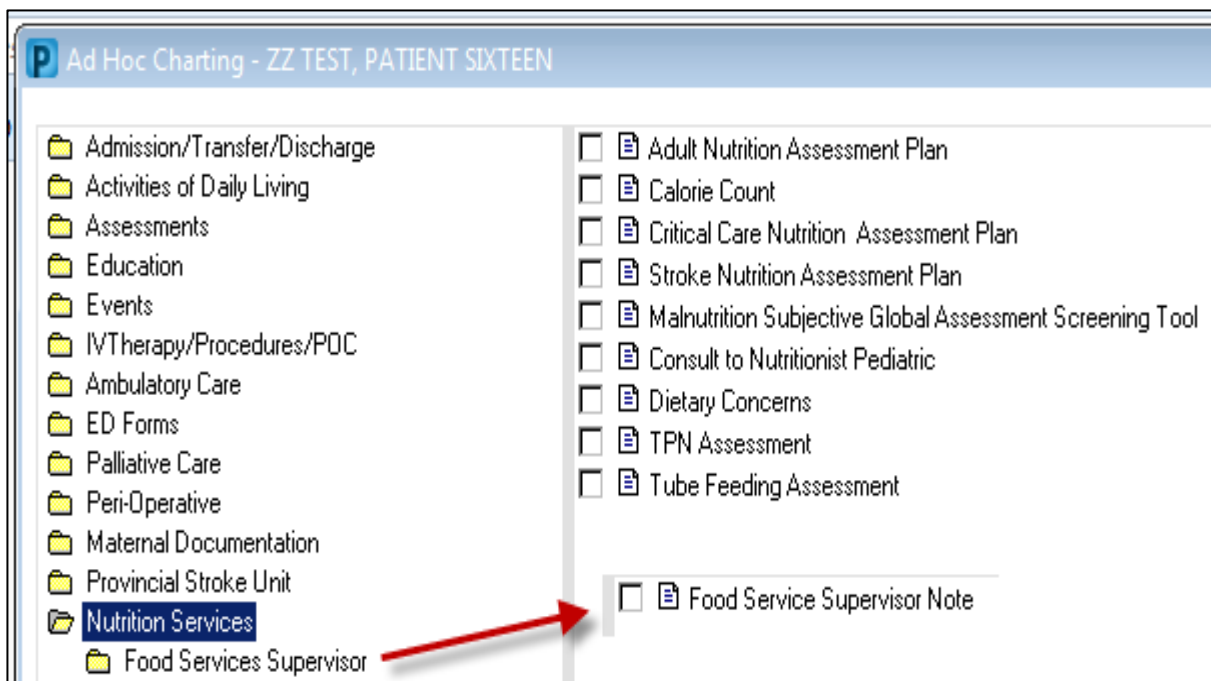

PowerChart Updates: (continued)

Nutrition Services Documentation Go Live:

Nutrition Services (Dietitians and Food Services Supervisors) will be documenting on several new forms. The forms will post to the documents tab under the type of Nutrition Services Documentation.

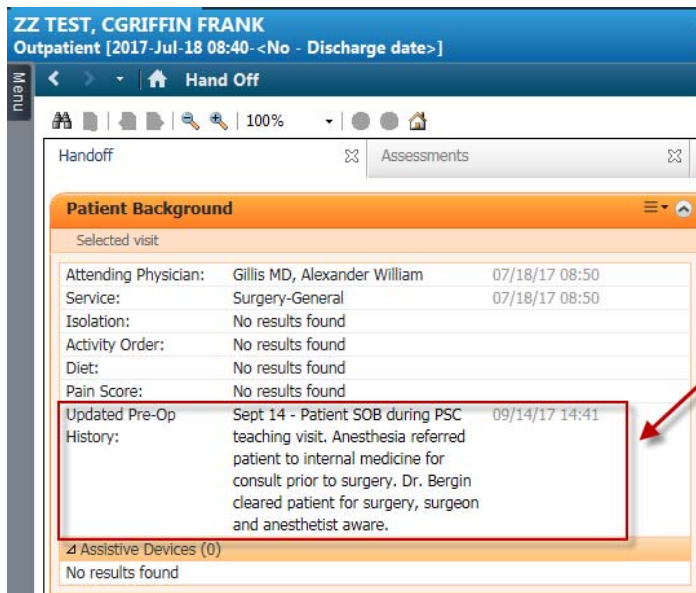

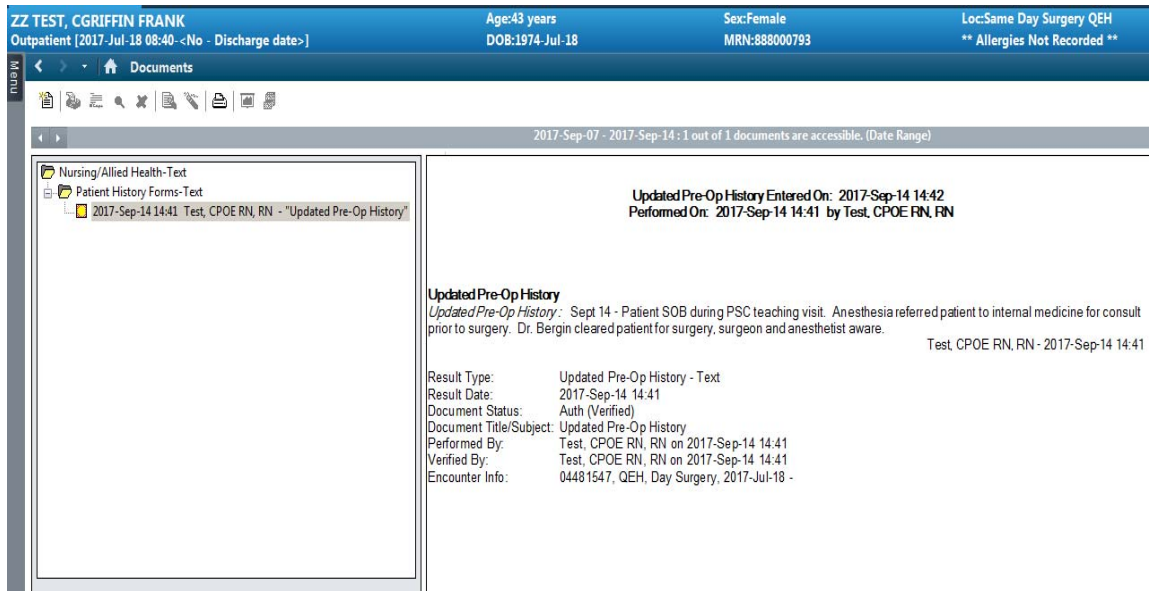

Updates to the Ad Hoc Folder:

PowerChart/FirstNet/SurgiNet update:

Updated Pre-Op History: QEH Surgical Suite and PCH Surgical Services nursing staff can now use a new PowerForm titled “Updated Pre-Op History” to chart important updates to a patient’s chart that occur between the pre-surgery teaching visit and the day of surgery. The completed form is visible on the Documents tab under Patient History Forms and will also be face-up on the Patient Background section of the Hand Off MPage.

The updated pre-op history will also flow to the Patient Background section of the Hand Off MPage
