

ATTENTION: ALL ENDUSERS

FALL TIME CHANGE

SUNDAY NOVEMBER 1ST

STARTING AT 0045 HRS

CORRECTION

With our latest code upgrade, we no longer require a scheduled downtime for the Fall time change. On November 1st, the Clinical Information System will remain operational; however there will be some impacts to external systems during the time change.

Starting at **0045hrs**, external systems such as the Client Registry (CR), Dragon dictation, Lab medical devices, Diagnostic Imaging RIS and medication dispensing cabinets will be unavailable for approximately 1.5 hours. Please be aware that any patient information coming from or going to these systems will not appear until approximately 0115hrs, after the time change.
