

ATTENTION: ALL ENDUSERS

FALL TIME CHANGE **SUNDAY NOVEMBER 7TH** **STARTING AT 0045 HRS**

With our latest code upgrade, we no longer require a scheduled downtime for the Fall time change. On November 7th, the Clinical Information System will remain operational; however there will be some impacts to external systems during the time change.

Starting at **0045hrs**, external systems such as the Client Registry (CR), Dragon dictation, Diagnostic Imaging RIS and medication dispensing cabinets will be unavailable for approximately 1.5 hours. Please be aware that any patient information coming from or going to these systems will not appear until approximately 0115hrs, after the time change.
