

MONTHLY BULLETIN

ATTENTION: ALL FACILITIES

**UPDATES OCCURRING WITHIN THE CIS THE
WEEK OF - FEBRUARY 25TH, 2019**

The following solution areas have updates:

PowerChart (Physician) - Page 2

PowerChart, FirstNet & SurgiNet - Page 3

UPCOMING EVENTS

There are no upcoming events in CIS.

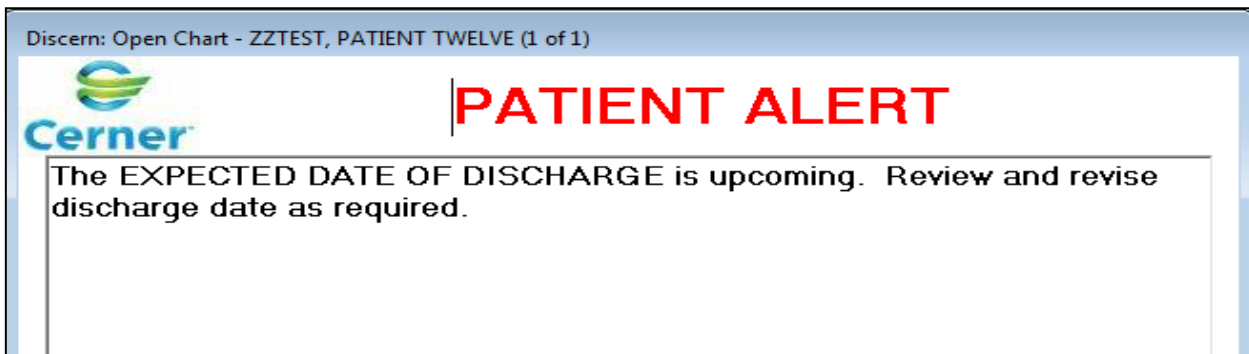

PowerChart: Physician Updates

Physician Update - Expected Date of Discharge (EDD): The order will be mandatory on March 5th. It will look different than it does now.

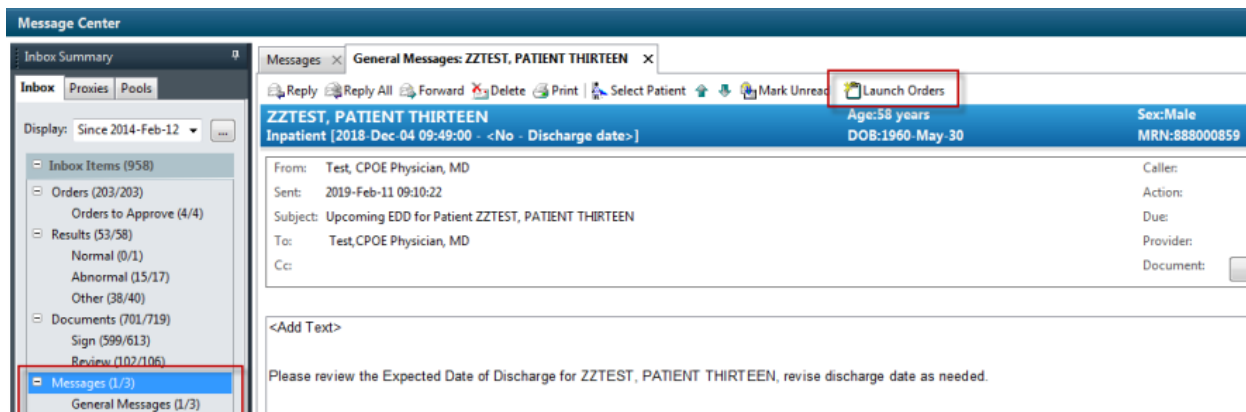

Revised Order - Available as a single order and in the admit PowerPlans

New Alert

The new alert will fire 48 hours out from the projected stop date and time of the order. It will only fire once every 24 hours on chart opening.

The alert will also fire to Message Center under Messages. Right click to open the message, select Launch Orders to go to the chart to update the EDD.

PowerChart Updates - For all PowerChart, FirstNet & SurgiNet Users

Est CrCl Cockcroft-Gault and Est CrCL Cockcroft-Gault - AdjBW (adjusted for body weight)

These posted results are clinical calculations for estimated creatinine clearance that are determined using the patient's most recent serum creatinine and charted weight. These are **NOT LAB RESULTS**. They appear on the Recent Results (Quick View flowsheet) tab.

The screenshot shows the 'Results Review' interface. The 'Recent Results' tab is active, and the 'Quick View' flowsheet is selected. The table displays results for 'Est CrCl Cockcroft-Gault' with a value of 82.08 mL. A red arrow points to this row, and a text box explains that this is a new clinical calculation added in December 2018, which is not a lab result.

Quick View	2019-Jan-30 10:51	2019-Jan-30 10:15	2019-Jan-30 09:37	2019-Jan-30 09:10
Est CrCl Cockcroft-Gault				
Est CrCl Cockcroft-Gault	* 82.08 mL			

New clinical calculation added in December 2018. This is NOT A LAB RESULT.
