**UPDATES OCCURRING WITHIN THE CIS THE  
WEEK OF - JANUARY 27TH, 2020**

**The following solution areas have updates:**

**PowerChart/FirstNet/SurgiNet - Page 2**

**FirstNet - Page 3**

**PowerChart - Page 3**

**General Information Tips/Reminders - Page 4**

---

## **UPCOMING EVENTS**

**There are no upcoming events in CIS.**

## PowerChart/FirstNet/SurgiNet Updates:

**Explorer Menu for Reporting** - Is being retired and will be replaced by the Reporting Portal on the PowerChart/FirstNet/SurgiNet toolbar and can be added to app bar.

- Both icons will remain on the toolbar until Feb 24, 2020 at which time Explorer Menu will be removed.
- A first time setup is required when you first access Reporting Portal.
- It's recommended you setup your favorites in the Reporting Portal prior to Feb 24th.

A Quick Reference Guide will be distributed within each facility.

## Update to ARO Documentation - Approved by Infection Control Practitioners

## Allied Health: Physiotherapy New Form - Vestibular Assessment in Ad Hoc Charting PT Folder

The screenshot shows a web-based form titled "Vestibular Assessment - ZZTEST ZZTEST ZZTEST, MASTER PATIENT PRINT". The form includes a date field set to "2019-Dec-31" and a time field set to "1340". A sidebar on the left lists various assessment categories, with "Subjective Vestibular Assessment" selected. The main content area is divided into "Subjective" and "General" sections. The "Subjective" section contains a list of checkboxes for various symptoms and conditions, such as "Breathing exercises", "Chest / Respiratory Physiotherapy", "Decreased strength", and "Fall Risk Assessment". The "General" section includes fields for "Reason for Referral" and "Additional Reason for Referral".

**Encounter Location Viewer** - This application will be available to certain positions - Nurse, Nurse Manager and Ward Clerk. The application allows you to track patients throughout your institution as well as keep an online record of each location associated with an encounter.

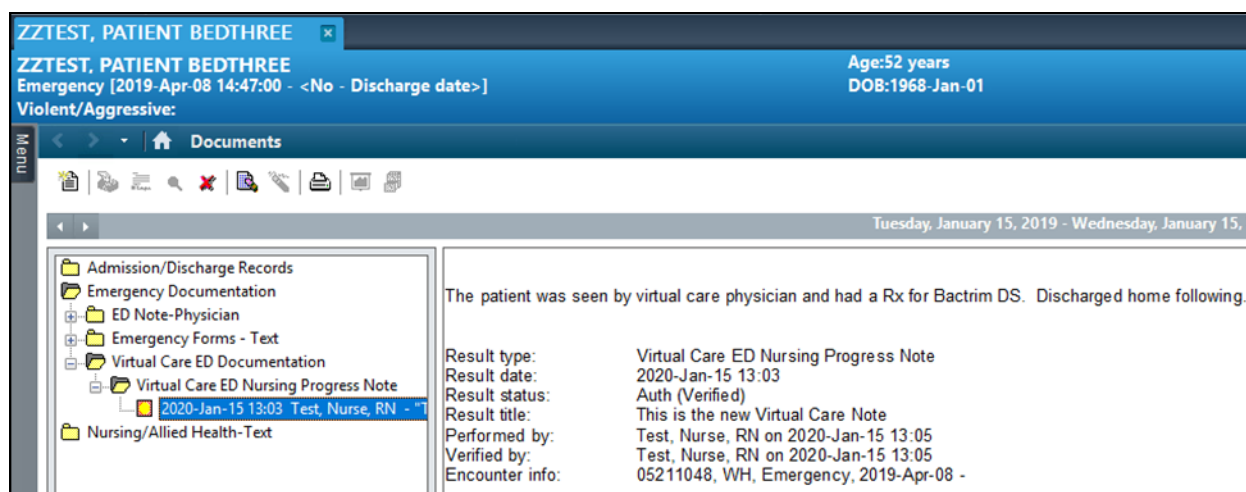

A Quick Reference Guide will be distributed within each facility

## FirstNet Updates:

### Western Hospital Virtual Care ER Decanting Pilot

Starting Feb 26th the WH ER will be piloting an ED decanting program which will see PEI licensed physicians managing some appropriate CTAS level 4/5 patients virtually. Nursing will be documenting a summary of the visit under the Virtual care documentation folder using the Virtual Care ED Nursing Progress note.

## Power Chart Updates:

### Updated Adult Admission Assessment and History - New Form

### Canadian Health Outcomes for Better Information and Care (C-HOBIC) assessment.

During the release week in February, staff will be transitioning to a revised Adult Admission Assessment and History. The content of these forms has been reduced based on an assessment of the usage of the data fields by nursing staff across PEI last summer. In addition, staff will be competing the Canadian Health Outcomes for Better Information and Care (C-HOBIC) assessment. C-HOBIC has been a pilot project at KCMH Medical and PCH Surgical Units for the past 12 months. The C-HOBIC assessment introduces a standardized, common language for patient assessment and documentation for nursing sensitive outcomes. It will help nursing staff develop a care plan for patient care and it provides evidence of the role nursing plays in patient outcomes in acute care. Clinical Educators are receiving education January 24th and January 29th, with educational sessions, information being presented to front line staff in the weeks to follow.

## General Information Tips/Reminders:

**Issue with the Scheduling tab with PowerChart** - There is an issue with the scheduling tab in PowerChart not working properly. This impacts anyone using the scheduling tab within the chart including Physicians, Nursing and Allied Health positions.
