UPDATES OCCURRING WITHIN THE CIS THE

WEEK OF - JULY 24TH 2023

The following solution areas have updates:

PowerChart, FirstNet & SurgiNet - Pages 2 - 4

UPCOMING EVENTS

Privacy Matters Corner...

Did you know that something as simple as confirming that all of a patient's information is correct by checking at each visit (name, DOB, MRN, etc.) can help prevent breaches? Demographics such as address, phone number and next of kin must also be confirmed and kept up-to-date. This helps to ensure that future

communication with the patient is sent to the correct address by mail and the patient is able to be reached by phone. Accurate information helps to prevent unintentional breaches of personal health information. Take the extra minute to ask these questions...it's worth it to protect the patient's information and it will save time in the long run when a breach is prevented.

PowerChart, FirstNet & SurgiNet Updates:

Powerplan Update:

NEW** Bariatric Consults

New Note Types:

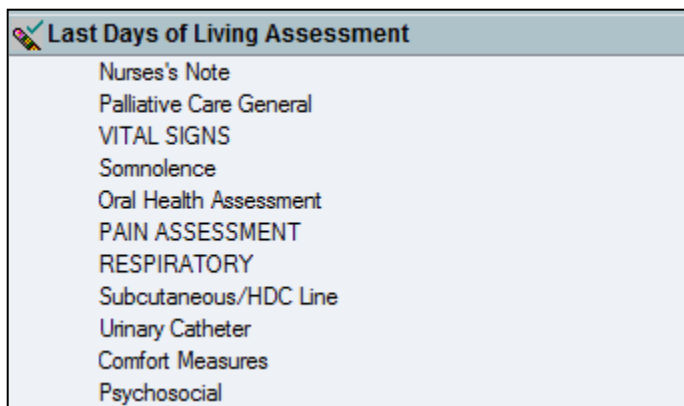

ED Critical Care Transport Note will be located under Emergency Documentation folder on the Documents tab.

Procedure Note – Nurse Practitioner will be located under the Procedure Notes Folder.

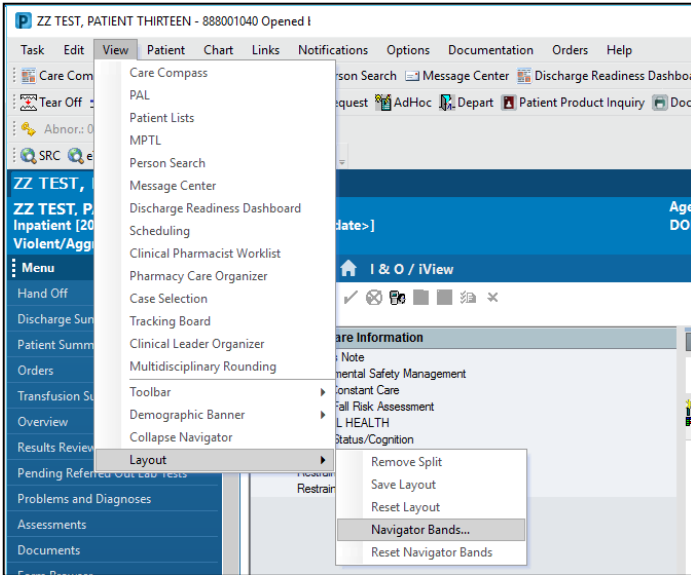

Updates to iView- New Band Last Days of Living Assessment

PowerChart, FirstNet & SurgiNet Updates:(continued)

To access the band, be on I & O/iView option on the Menu/Table of Contents. Proceed to View on the toolbar> Layout> Navigator Bands and move the band from Available to Current OR ask your Clinical educator for assistance.

Update to the Duration field display for medication orders

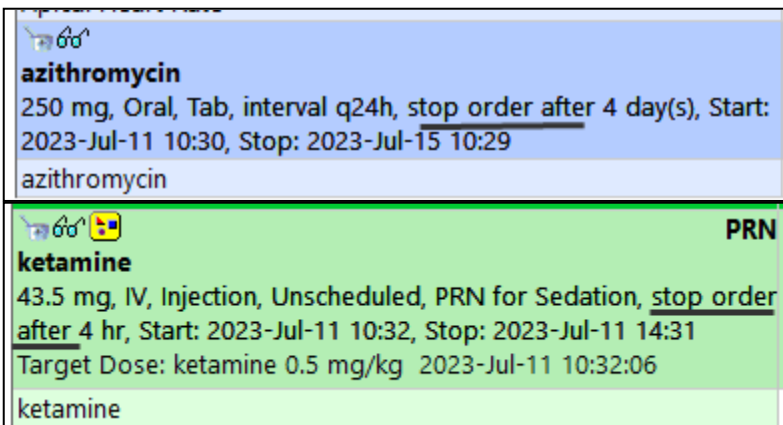

Currently, the Duration field has the prefix “for” in the order details for medication orders. There are some scenarios where this can be a bit misleading – especially for PRN orders and orders in PowerPlans that must be stopped after a certain period.

To provide clarity, the prefix will be updated from “for” to “stop order after”.

Current state:

After update:

PowerChart, FirstNet & SurgiNet Updates:(continued)

Reminder: Maternal Community Liaison and Newborn Community Liaison forms MUST be completed (signed) prior to discharge of the patient to generate the reports to Public Health. If not completed prior to discharge, the forms must be completed then manually sent to Public Health.

The screenshot shows a software window titled "Newborn Community Liaison Record - ZZTEST, MASTER PATIENT". The window includes a toolbar with various icons and a header area with the following information:

- *Performed on: 2023-Jul-06 14:37 ADT
- By: IV

The main content area is divided into two columns:

- Contact Information**
 - Patient Contacts
 - ZZTEST, LURCH
 - Emergency Contact
- Temporary Address (if different from mother)**

A red warning box on the right side of the form states: "This form must be completed/signed PRIOR to discharge in order to generate the report to Public Health. If not completed prior to discharge, the form will have to be manually sent (faxed) to Public Health."

If you need to print the Liaison Record, please follow current eChart printing processes OR ask your Clinical Educator.
