

MONTHLY BULLETIN

ATTENTION: ALL FACILITIES

UPDATES OCCURRING WITHIN THE CIS THE

WEEK OF - JULY 28TH, 2025

The following solution areas have updates:

OrderSet Updates - Page 2

PowerChart Updates - Pages 2 - 3

Foundations Updates - Page 4

Privacy Matters Corner.....

Accessing your own chart in CIS is not permitted! Health PEI is modernizing its policy on how staff access their own medical information in the CIS. This change is necessary to ensure we are compliant with the *Health Information Act* and following Health PEI's [Privacy and Protection of Personal Health Information Policy](#). It will also make our practices consistent with other provinces and with guidance from professional associations.

Note that the [Pledge of Confidentiality](#) that all staff are to review and sign also requires that the staff agree that they will not access their own health records.

When requesting your records, you are doing so as a patient and not for the purposes of providing care, so staff will follow the same process as patients when requesting access to their own health records.

To request your records from the EMR or community programs and clinics, staff will complete and submit the [Request to Access or Disclose Personal Health Information Form](#) to the appropriate record holder.

If staff are requesting their hospital records, they can do so by filling out the webform [here](#).

Please contact healthprivacy@ihis.org with any questions.

OrderSet Updates

Update! VTE Prophylaxis order set – dosing for enoxaparin in patients greater than 100 kg is now 60 mg q24h (updated from 40 mg q12h) per Thrombosis Canada

PowerChart Updates

Powerforms/iView/Orders - Orders - IPAC Patient Ambulation Care Plan

Reminder: Effective June 24, 2025. There is a new Order/Powerform for Infection Control Practitioners. If a patient is placed on Isolation, please contact the ICP who will assess and place the new order. The Ambulation Care Plan notification will be posted to Hand Off under the Patient Information section. For details, please refer to the Orders page.

Search:

Folder: [IPAC Patient Ambulation Care Plan](#)

Folder:

- Holter Monitor (AMB) - CHO, WH
- Holter Monitor (AMB) - QEH, PCH, KCMH
- Holter Monitor (AMB) - SH
- Holter Monitor (In Patient)

Foundations Update:

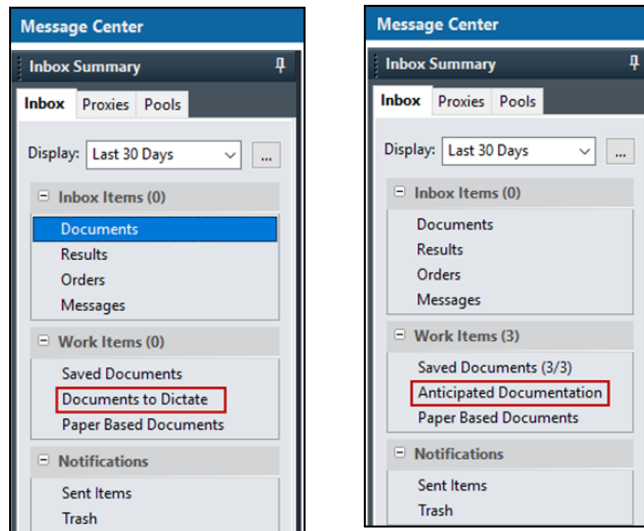

Dynamic Documentation

Currently, Documents to Dictate (Anticipated Documentation) are fired once a patient is discharged to alert physicians they are required to complete documentation.

With the implementation of Dynamic Documentation, a new workflow has been introduced to certain groups. This change is to the terminology in order to limit confusion.

This WILL NOT change any processes. The only change is to the wording.

Documents to Dictate will now be Anticipated Documentation:

On your Deficiency Letters, instead of Pending Dictation it will now read Pending Documentation. You will still be required to complete your documentation as per standard protocol.
