

MONTHLY BULLETIN

ATTENTION: ALL FACILITIES

**UPDATES OCCURRING WITHIN THE CIS THE
WEEK OF - SEPTEMBER 28, 2020**

The following solution areas have updates:

PowerChart - Page 2

FirstNet - Pages 2 - 3

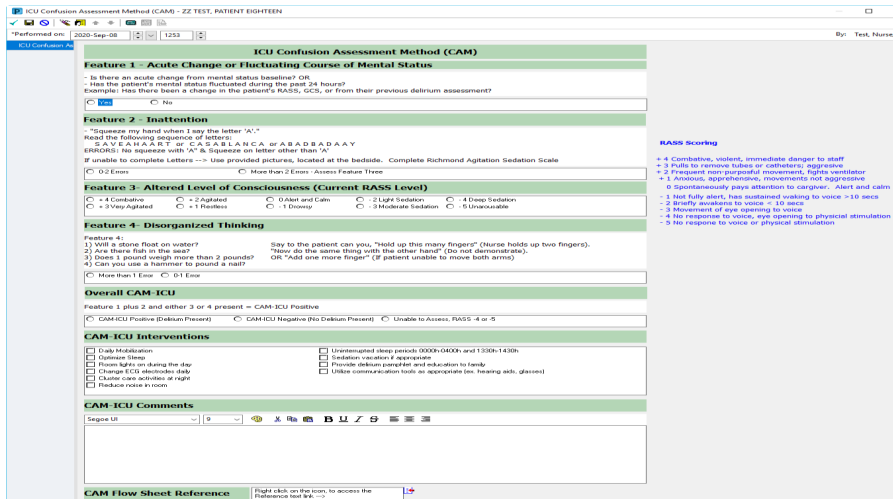

Order Sets - Page 3

UPCOMING EVENTS

There are no upcoming events in CIS.

PowerChart Updates:

New powerform - ICU Confusion Assessment Method(CAM):

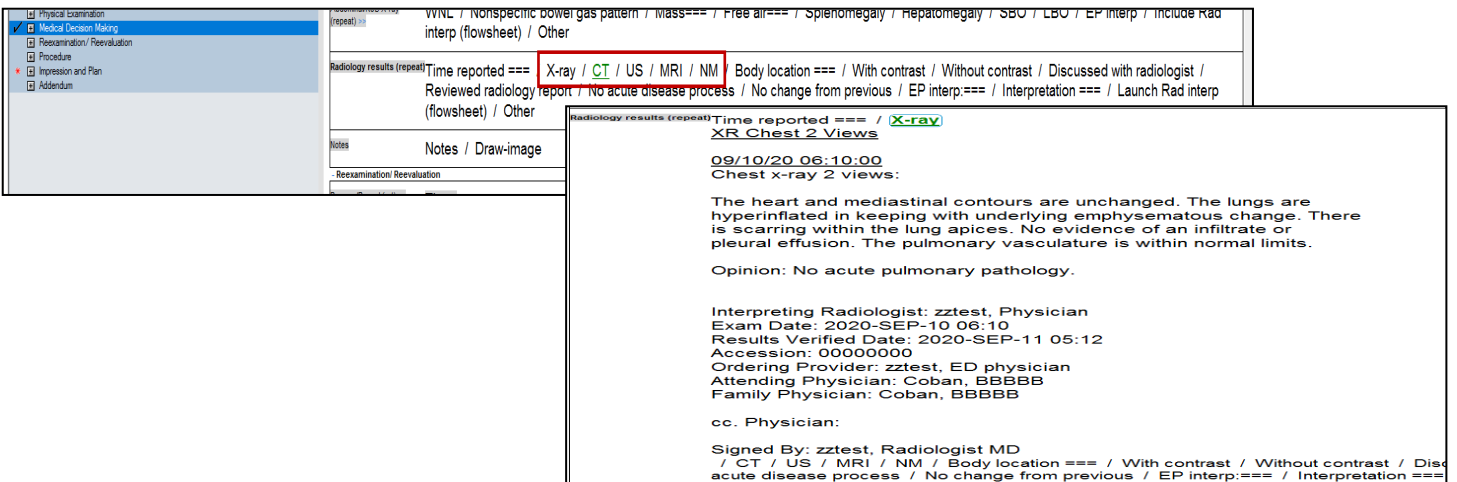

Conley & TLR Tasks - As a result of the implementation of the Nursing Documentation Standard, the Conley and TLR tasks will no longer fire to the task list 7 days after originally charted on admission. These assessments/tasks will remain within the appropriate forms and powerplans.

Reminder regarding PICC Insertion information - This is documented on the History tab. Please review for current PICC information.

FirstNet Updates:

PowerNote ED Enhancement Functionality

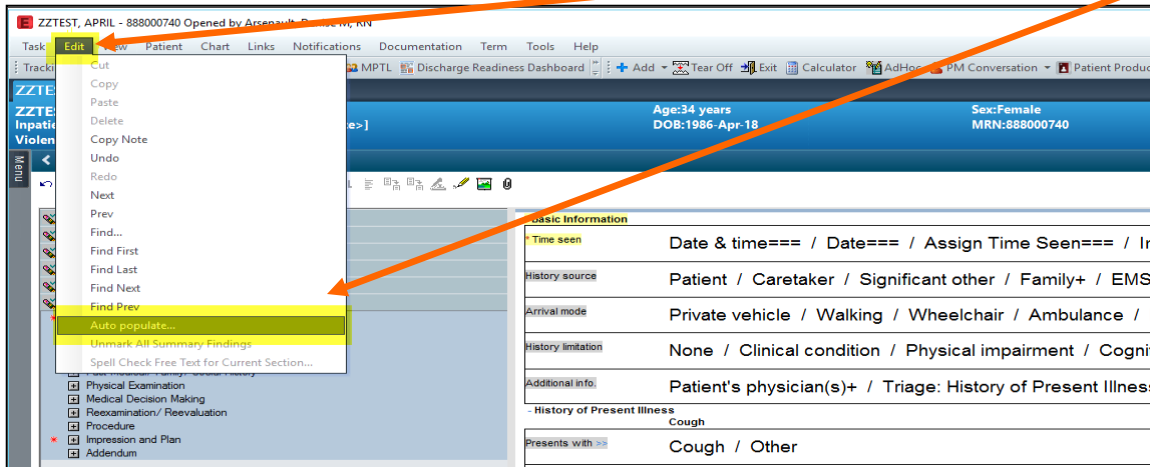

Reduce time copying and pasting DI results into PNEd. In the Radiology results section, click X-ray, CT, US, MRI or NM term to populate the recent reports automatically into your note. This eliminates time copying and pasting DI results into PNEd.

FirstNet Updates: Continued

To change user choices in the ED PowerNote - (for example)

- Adding the new pre-arrival form option - access the auto - populate window.
- You can access the auto-populate window by using the “Edit” button and choose “Auto-populate”

Order Set Updates:
