MEMORANDUM

TO: Health PEI Staff and Physicians
FROM: Provincial Medication Reconciliation Steering Committee
DATE: June 7, 2024
SUBJECT: Admission Medication Reconciliation Functionality Change

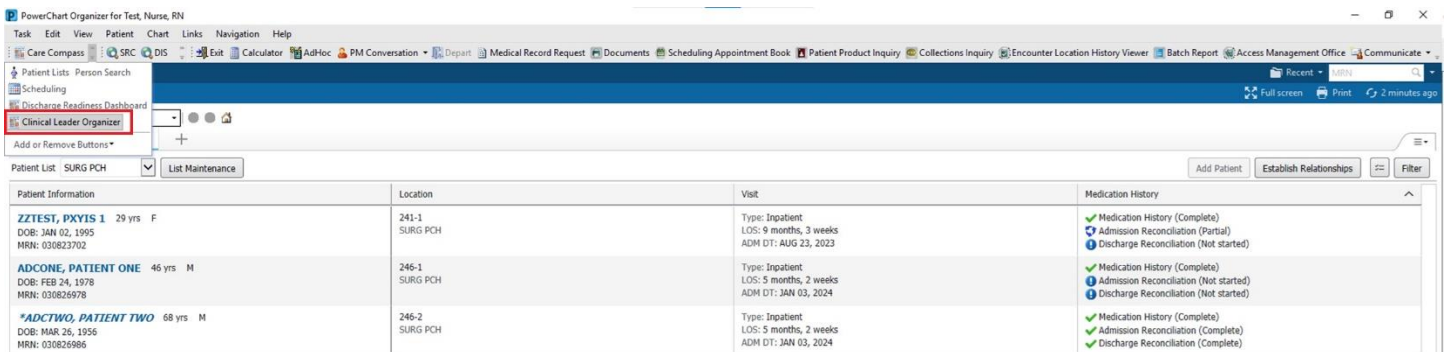

In response to medication-related patient safety concerns, a functionality change for **Admission Medication Reconciliation** will go live in the CIS on **June 25, 2024**.

- **Admission Med Rec will NOT be accessible until the best possible medication history (BPMH) has been completed (i.e. Meds History = GREEN check mark).**

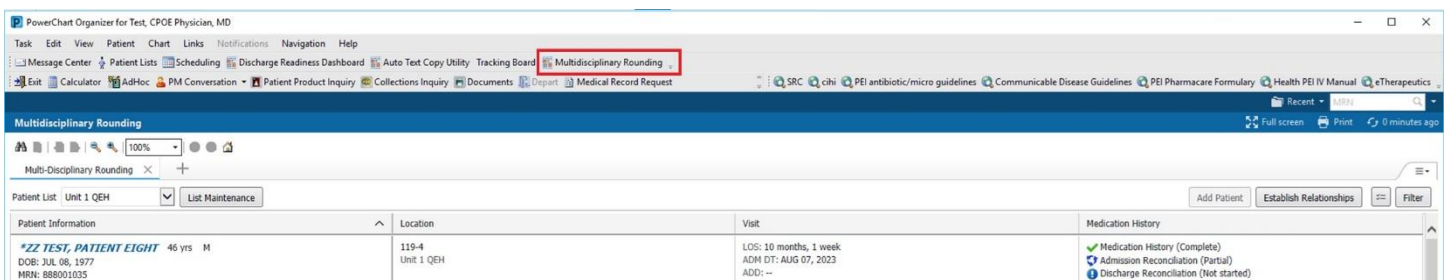

To facilitate the change:

- The “Clinical Leader Organizer” has been added to the nursing tool bar for all nursing staff. This page identifies patients requiring a BPMH and Admission Medication Reconciliation. This will NOT replace the current alert which fires when the chart is opened to notify that the BPMH is not complete.

- The “Multidisciplinary Rounding” tab has been added to the physician’s screen. This identifies patients requiring a BPMH and Admission Medication Reconciliation. This will NOT replace the current alert which fires to notify that the Admission Medication Reconciliation is not complete.

The new functionality will impact workflow for physicians, nurses, and pharmacy staff: continued collaboration between all involved with Med Rec is required to ensure safe and timely ordering of patients’ home medications. The change is expected to improve patient safety and provide efficiency for order verification by reducing the frequency of retrospective Med Rec, medication discrepancies, and related follow-ups.
