**TO: Facility Leadership and Staff**

**FROM: Mike Devine – CIS Operations Manager, Kerry Rogers – CIS Manager**

**DATE of Notice: October 14, 2026**

**SUBJECT: RIS to RadNet Migration**

---

**Subject: RadNet Go-Live Scheduled for October 24/25, 2026**

**To: All Health PEI Staff**

This is a reminder that **Oracle Cerner RadNet** is scheduled to go live across Health PEI on **October 25, 2026**.

RadNet will replace the current Radiology Information System (RIS) and support key Diagnostic Imaging functions, including scheduling, order management, reporting, and information sharing. This implementation is an important step in modernizing the systems that support Diagnostic Imaging services and creating a strong foundation for future enhancements.

We would like to thank the many clinical, operational, and technical teams who have contributed to planning, testing, training, and readiness activities. Additional support resources will be available during the go-live period to assist staff and help ensure a smooth transition.

As with any major system implementation, some temporary workflow adjustments may be required. We appreciate your patience, flexibility, and continued support as we move through this important milestone.

Further updates and go-live information will be shared in the days ahead.

Thank you,

**Clinical Information Systems (CIS)**
**Health PEI**
