# Adding Pregnancies in Women's Health
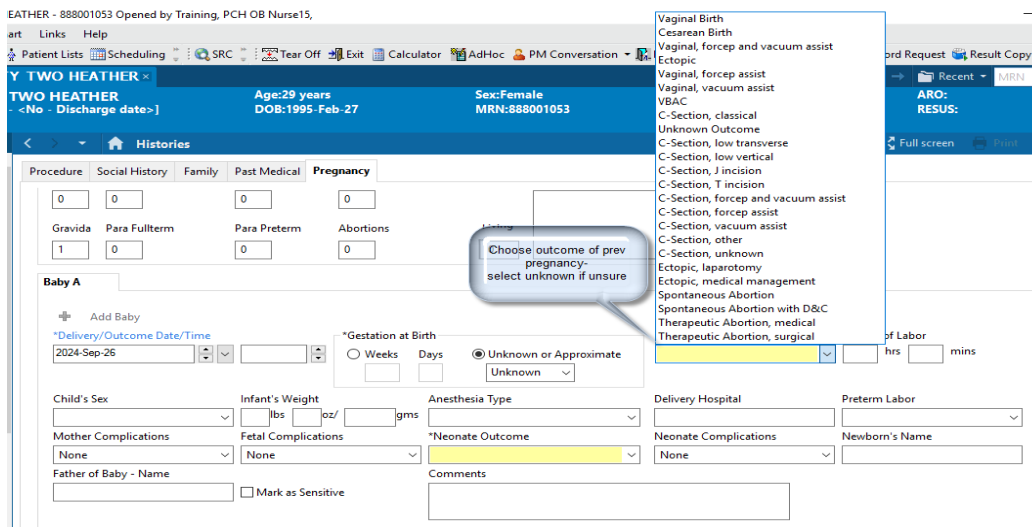

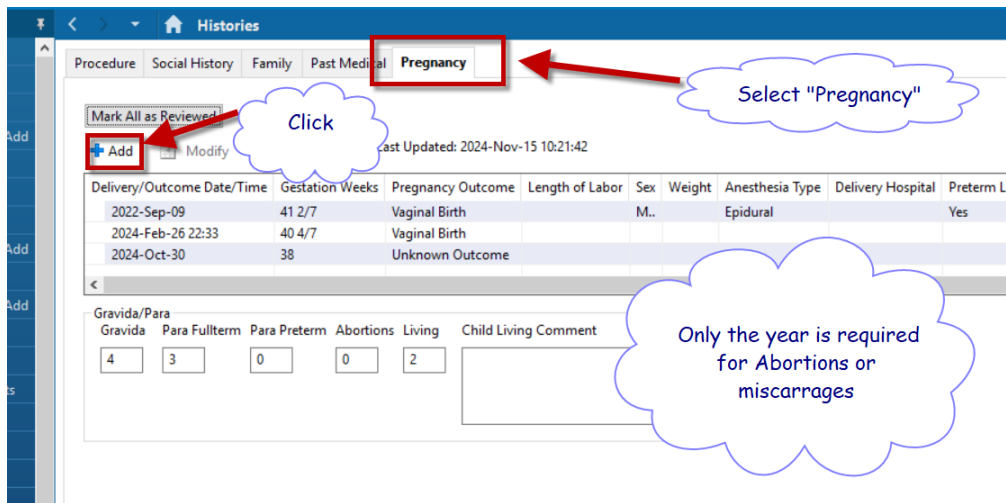

1. Click "Add Pregnancy"

2. Enter LMP or Ultrasound tab if patient had revised EDD confirmed by early u/s
3. The responsible provider will default to the provider entering the information, this needs to be changed to the most responsible provider (obstetrician/midwife/family physician)

4. Click on the "Gravida/Parity" to add previous pregnancies/delieveries

5. Click "Pregnancy"
6. Click "Add"
7. Enter all the information provided on the Prenatal Record
8. Only the year and/or month is requried if the patient has experienced abortion/miscarriage

To update information on previous pregnancy:
1. Open "Histories" 2. Click on "Pregnancy"
3. Select pregnancy 4. Select "Modify" and enter data

Updated information will display in "Pregnancy Overview"
