Caresets

- Caresets (identified by the icon that looks like a white pizza box 🗐) are a groups of orders developed to help with ease of entering orders.
- Lab utilizes many Caresets, they all function the same way
- The quantity of orders within a Careset varies.
- Some Caresets have the collection priority defaulted, i.e. 'AM Next Day' contains common lab orders with the collection priority defaulted to 'AM Next Day'.
- Some Caresets contain the information previously found on paper requisitions. ie. the "General Lab orders mirror the GenLab requisition
- The "Lab Orders" Careset is an alphabetized version of the "General Lab order" Careset.
- To make the same change to details on more the one of these selected orders; click on orders for signature, hold down the CTRL key, multi-select orders in a Careset, and change the desired detail. Changing the order details affects all the selected orders at once. i.e.: Priority changed from Stat to Routine.

P Careset - General Lab orders			
8			
Component		Order Details
