

Lab Order Details

Order Details specific for Lab Orders

Specimen type – this is preselected to be “Blood” where appropriate

Priority or Collection Priority – this is preselected to the most commonly used depending on the area placing the order. This can be changed where required

A screenshot of the Lab Order Details form. The 'Specimen type' dropdown is set to 'Blood' and is highlighted with a red box. The 'Collection priority' dropdown is set to 'Routine' and is also highlighted with a red box. A green box labeled 'Pre-selected' points to the 'Blood' selection. Other fields include 'Collected' (radio buttons for Yes and No, with No selected), '*Only Adjust Start D/T if needed for a specific time:' (2017-Dec-01, 1054), 'Duration:', 'Stop date and time:', 'Frequency:', 'Duration unit:', and 'Nurse collect:' (radio buttons for Yes and No).

Collected – this is preselected to “No” but can be changed if the specimen has been collected before the order was placed in PowerChart (this may happen with some Micro specimens such as wound swabs or in emergency situations).

Collected By – Enter the name of the clinician who collected the specimen

A screenshot of the Lab Order Details form. The 'Collected' radio buttons are highlighted with a red box, and a green box labeled 'Select "Yes"' points to the 'Yes' option. The 'Collected by' field contains the name 'Foole, Wendy P, RN' and is highlighted with a red box. A green box labeled 'Name of clinician who collected specimen' points to this field. Other fields include 'Specimen type: Blood', '*Collection priority: Routine', '*Only Adjust Start D/T if needed for a specific time:' (2017-Dec-01, 1054), 'Duration:', 'Frequency:', and 'Duration unit:'.

Start Date/Time or Requested Start Date and Time- this is preselected to today’s date and time.

A screenshot of the Lab Order Details form. The '*Only Adjust Start D/T if needed for a specific time:' field is highlighted with a red box, showing '2017-Dec-01' and '1054'. Other fields include 'Specimen type: Blood', '*Collection priority: Routine', 'Collected by: Foole, Wendy P, RN', 'Frequency:', 'Duration unit:', 'Nurse collect:' (radio buttons for Yes and No), and 'Special Instructions: ASAP = Label prints on order. Results are NON URGENT'.

Nurse collect-you have the option of “Yes” if being collected by the nurse or “No” if being collected by the Lab.

A screenshot of the Lab Order Details form. The 'Nurse collect' radio buttons are highlighted with a red box, and a green box labeled 'If Specimen to be collected by a nurse Select "Yes"' points to the 'Yes' option. Other fields include 'Specimen type: Blood', '*Collection priority: Routine', 'Collected by:', 'Frequency:', 'Duration unit:', 'Stop date and time:', and 'Special Instructions:'.

Special Instructions-this is a field for individual departments to enter a comment or instructions for clinicians. **Do not freetext into this field.**
