## **MAR Summary**

The MAR Summary displays a condensed view of a patient's medication administration record.

- Medications and Continuous Infusion are sorted in sections the same as the MAR (eg: Scheduled, Continuous Infusions).
- Within each section, Medications & Continuous Infusions are displayed in alphabetical order.
- The column that the current date and time falls under is highlighted in yellow.
- Time columns are displayed 48 hours in the past.
- Tasks display only 36 hours into the future.

## **Administration Details**

Administration details *are* available on the same row as the order information. They sit underneath the appropriate date/time column.

1. A charted medication displays the dose given and the time it was administered.

2. Hover your cursor over the charted dose to access additional details about the charted event.

Pending medication administrations are highlighted in light blue and display the next scheduled administration time.

Unscheduled medications are located under the **Unscheduled** section and highlighted in light blue underneath the current date/time column.

PRN Medications display in the "**PRN**" section underneath the current date/time column.

Continuous IV's that are pending administration will display in the "**Continuous**" section underneath the current date/time column.

Continuous Infusions			
		CONT	1
75 mL/hr, IV, 1,000 mL, Start: 2012-Nov			

Overdue medications are displayed with a red background and the overdue icon.
