

Patient Schedule Tab:

Provides information about scheduled tests and procedures

Appointments:

- Are entered through Central Scheduling
- Are for acute care setting appointments only
- Travel across encounters
- Remain on the screen until the patient registers for the appointment
- Falls off this screen once an encounter for the appointment is created
- Provides information about date and time, appointment type and location

The screenshot shows the 'Patient Schedule' interface. On the left is a 'Menu' sidebar with various options, and 'Patient Schedule' is selected at the bottom. The main content area shows a table of appointments. A green callout box with a red arrow pointing to the table contains the text: 'appointments entered thru the central scheduling will remain here until the patient registers for the appointment'.
