

MONTHLY BULLETIN

ATTENTION: ALL FACILITIES

**UPDATES OCCURRING WITHIN THE CIS THE
WEEK OF - FEBRUARY 24TH, 2020**

The following solution areas have updates:

PowerChart - Pages 2 - 3

Lab - Pages 4 - 6

UPCOMING EVENTS

There are no upcoming events in CIS.

PowerChart Updates:

Revised Adult Admission Assessment and Adult Admission History will be available February 25th.

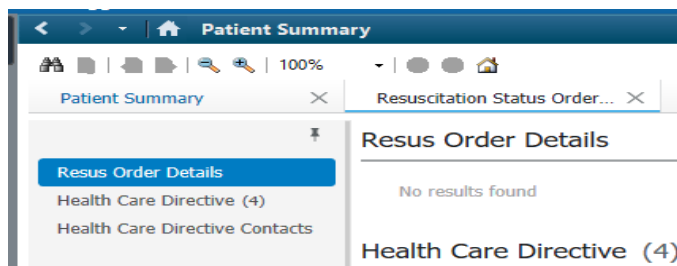

The content of these forms has been reduced based on an assessment of the usage of the data fields. In addition, staff will be completing the Canadian Health Outcomes for Better Information and Care (C-HOBIC) assessment. C-Hobic has been a pilot project at KCMH Medical and PCH Surgical Units. This assessment uses standardized clinical outcomes reflective of nursing practice. The information collected will support the coordination and effectiveness of patient care planning and will provide evidence of the role nursing plays in nursing sensitive patient outcomes. The C-Hobic assessment is completed at admission and again on discharge.

The forms, Adult Admission Assessment, Adult Admission History and the C-HOBIC Assessment have been presented at educational sessions at your facility.

As part of the revision, **Social History**, has been expanded to include additional topics. There is one required field **Used Tobacco/six months**. This will need to be addressed each admission.

Health Care Directive Updates

The Health Care Directive is an important aspect in advance care planning. The Health Care Directive CIS form has been updated to reflect current legislation governing Health Care Directives. Current and historical health care directive information including the date signed, proxy information and location of the most current health care directive will populate to the historical 'resus order tab' found on the hand off page. This information will be useful in starting a conversation with patients and families when inquiring about the most recent signed document. A new health care directive form is still required with each admission assessment.

Handoff, Patient Summary, Hospitalist Summary etc **NOTE:** It will **NO LONGER** post to Patient Information section of the summary pages.

PowerChart Updates:

Update to Care Plan: There will now be the opportunity to add additional problems, interventions and outcomes. No change to the Team Updates/ Actions component.

If you already have care plan information documented, you will be able to copy from the old format to this new one.

The Retiring Care Plan (form name) form will be available until February 28th and located in the Shift Summary Ad Hoc Folder.

New Order for Hand Hygiene Education: This order will post to the orders page 1 day after admission. The order will place a task on the task list, to enable staff to complete the form.

Patient Care		Specimen Collection	
Task retrieval completed			
Task Status	Scheduled Dt/Tm	Task Description	Order Details
Pending	2020-Feb-12 10:03	Hand Hygiene Education	Start: 2020-Feb-12 10:03

PowerChart/FirstNet/SurgiNet Updates:

Explorer Menu for Reporting: Is being removed on Feb 24, 2020 and is replaced by the Reporting Portal on the PowerChart/FirstNet/SurgiNet toolbar and can be added to app bar. It's recommended you setup your favorites in the Reporting Portal prior to Feb 24th.

Emergency Department Pre-Arrival Form: The QEH Emergency Department physicians and staff will be using a pre-arrival form in CIS to document reports from EMS or telephone reports. The information can be found in the Emergency folder in Documents tab in the Emergency forms subfolder.

Lab Update: (continued)

To reflect changes in Laboratory testing:

- **RSV Antigen Detection** is being removed as it is run in conjunction with influenza testing by PCR.
- **Influenza PCR** will be renamed **Influenza/RSV PCR**

Before Change:

Previously CPOE orders were found searching under “RSV Antigen Detection”, “influenza PCR”, or “Influenza/RSV/PCR”

The screenshot shows the 'ZZTEST, LOUISE - Add Order' interface. The patient information bar at the top includes: ZZTEST, LOUISE, Age:21 years, Sex:Female, Recurring [2018-Jul-17 14:19:00 - <No - Disc...], DOB:1999-Jan-18, MRN:888000736, and Violent/Aggressive: ... The search bar contains 'rsv antigen'. The search results list one item: 'RSV Antigen Detection'.
