

Code Upgrade – January 2023

Distribution Manager

Reminder to users, selections will need to be updated before use on **Find: All Items** window, after Code Upgrade. Search results will be unsuccessful until settings are selected and will then be remembered by the system next time application is opened. Users can update selections as desired for specific search results.

The screenshot shows the 'Find: All Items' search window. The 'General' tab is selected. The search criteria are as follows:

- Item number
- Description
- Short description
- Clinical description
- Mfr catalog number
- Other: DIN
- Search For: Begins with furosemide
- Location: [empty]
- Include sublocations
- Class: [empty] Browse...
- Include subclassifications
- Vendor: ALL
- Manufacturer: [empty]

Buttons on the right: Find Now, New Search, Get More, Help. Buttons at the bottom: OK, Cancel.

Item Type tab needs all 3 boxes checked off to be able to search for all items (supplies and meds)

Find: All Items

General **Item Type** Advanced

View items of this type:

- Equipment Master
- Item Master

Physical Count

The count quantity is now displayed on the Variance report in Physical Count.

Previously on the Physical Count variance report the Item Count quantity was not displayed.

Cerner Material Management System
Physical Count - **Variance Report**

Item Number Locator	Item Description Lot Number	ItemCount Lot Count	UOM	Variance Value
2092390 Tablets/Capsules	5-aminosalicylic acid 400 mg EC Tab	_____	each	-\$188.12
2090401 Tablets/Capsules	5-aminosalicylic acid 500 mg (Pentasa) ER Tab	_____	each	-\$609.63
1520179 Tablets/Capsules	5-aminosalicylic acid 500 mg (Salofalk) EC Tab	_____	each	-\$932.78

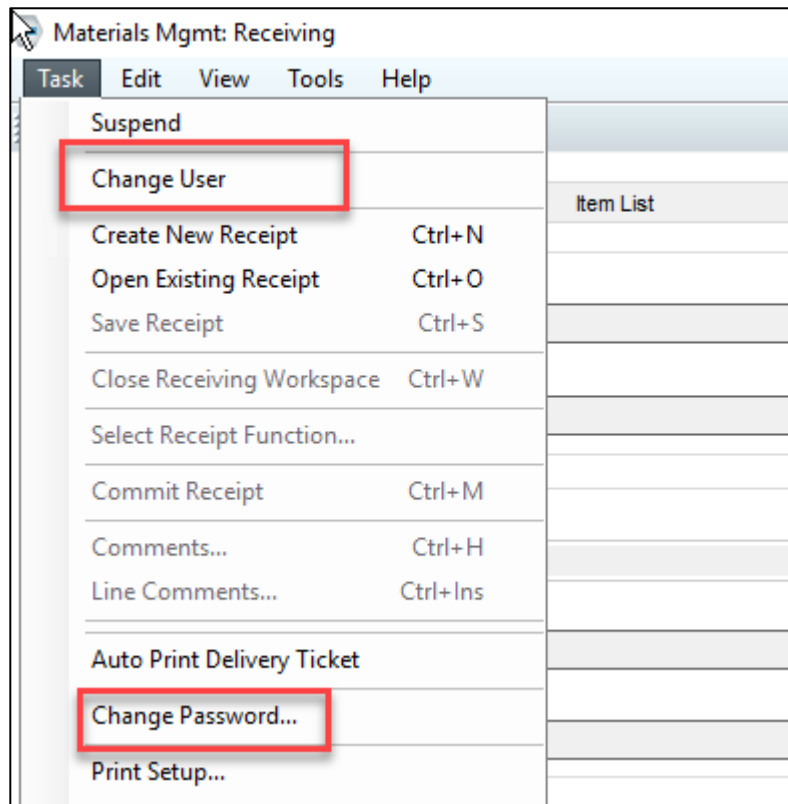

*After the upgrade you will notice that the **Item Count quantity** is now displayed:*

Cerner Material Management System
Physical Count - **Variance Report**

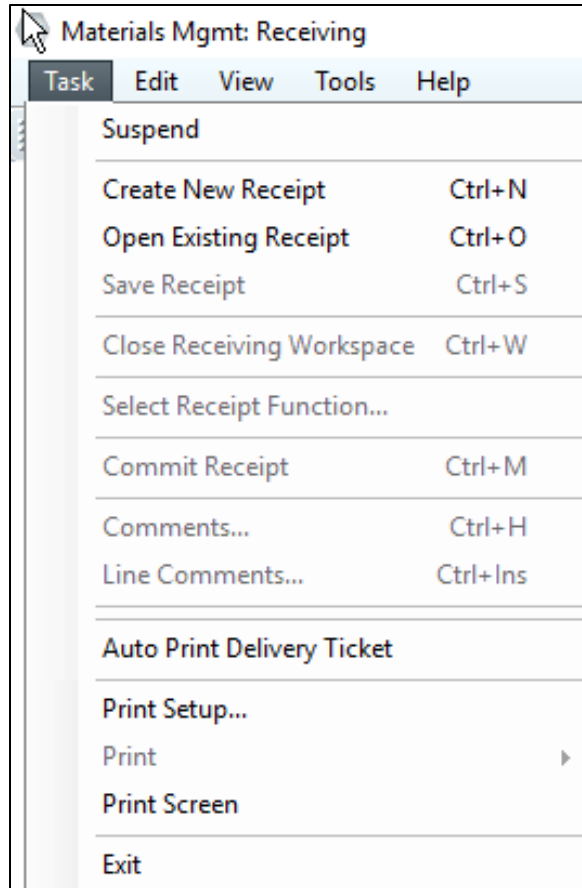

Item Number Locator	Item Description Lot Number	ItemCount Lot Count	QOH Qty Lot QOH	UOM	Unit Cost	Variance Value
1520239 Tablets/Capsules	amantadine 100 mg Cap	31	33	each	\$0.53	\$2.63
1522466 Tablets/Capsules	alprazolam 0.25 mg Tab	30	34	each	\$0.06	\$1.88

Task Menu in Applications

The Change Password and Change User commands are no longer supported, meaning they are not available from the Task menu in Clinical Inventory Management applications. To log in as a different user, you must now log out of any Clinical Inventory Management application. To change your password, you must contact your system administrator.

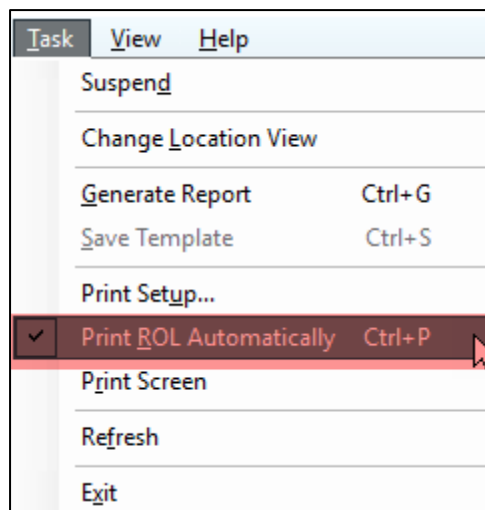

After the upgrade both options have been removed from view.

Recommended Order List

The Print ROL Automatically preference now remains selected until the user deselects it. Previously, closing and reopening the ROL window could cause this preference to become deselected.

Receiving

Commit button is now disabled in Receiving when you switch between the committed lines. Previously, without making any changes the Commit button got enabled.
