

Assessments Tab

- The assessment tab will pull information from power forms that have been completed by clinicians
- It is a good place to look for some information, but not all documented information will pull to this tab

There is:

1. **Navigator** section to help you move thru the information fields
2. **“Clinical Info”** section which gives you the question asked/answered
3. **Date and time columns.** ---these reflect the date and time the information was entered.
