

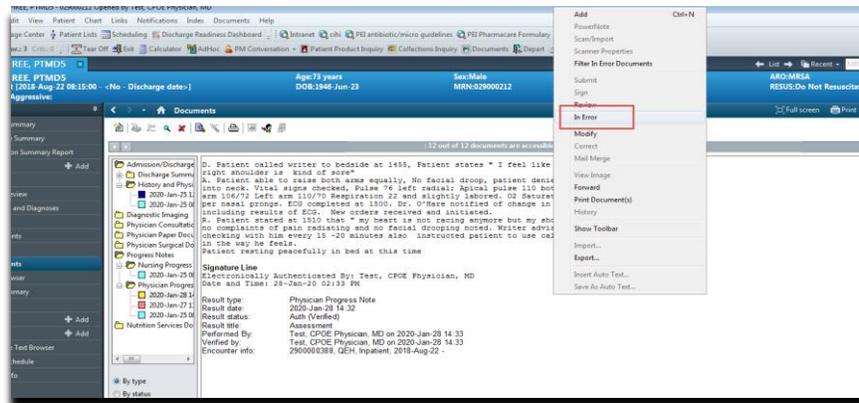

Charting “In Error”

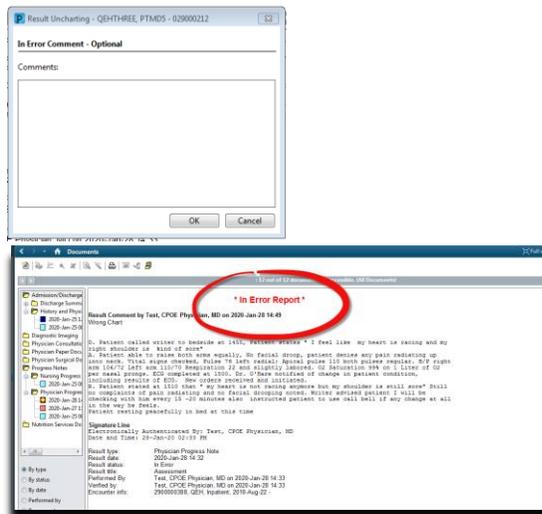

Once entered in the chart, incorrect documentation cannot be removed, but can be identified as “In Error”

1. Open the document, right-click anywhere in the document
2. Select “In Error”

The “In Error” comment box will populate.

3. Document the reason for incorrect documentation
4. Select “OK”

The document remains in the chart however it will populate as an “In Error Report”
