

Med List Tab

Available on Orders page or on Menu Bar

Divided into 3 categories:

1. **Inpatient Medications:** Medications ordered for the current encounter.
2. **Prescriptions:** Medications entered when physicians prescribe medications on discharge.
3. **Documented Medications by Hx:** Home medications entered by nursing, pharmacy technicians or physicians

- Display filter should be set to “**All Medications (All Statuses)**”

The screenshot displays the 'Medication List' interface. On the left is a 'View' sidebar with various filters. The main area shows a table of medications. A dropdown menu at the top right is set to 'All Medications (All Statuses)'. The table is organized into three sections: Inpatient, Prescription, and Documented Medications by Hx. Red arrows point from the 'Medications' section of the sidebar to the corresponding rows in the table.
