Clinical Range - Each of the Tabs have different defaults set for clinical ranges.

To change the clinical range, right-click the grey field and adjust the date back.

There are several tabs: Including

- 1. **Recent Results** –summary of all results from Vitals, Labs and DI –clinical range of 5 days.
- 2. Vitals- clinical range of 7 days.
- 3. Lab results- clinical range of 7 days. Right click on the result to display the normal high and low ranges.
- 4. Diagnostic Imaging- Clinical range 3 years only able to view final reports, not images
- 5. **Warfarin work sheet-** clinical range of 10 days will pull in INR and dosage information documented on the Medication Administration Record.
- 6. **Respiratory/COPD-** Assessments completed by RT's. Swallowing evaluations display.
- 7. Shift summary Is a brief summary of the patient during a shift.
- 8. **Rehab** Used specifically for this service.
- 9. **Diabetes Management** Displays a list of POC glucose, AIC and random glucose values, and hypoglycemic event documentation.
- 10. **Microbiology Viewer** -Displays Micro results and antibiotics ordered for a specific time frame.

## Filters available:

On Lab Tab:

- Default is "Table" view -displays results in date and tine columns
- Some but not all subnormal results will display in Red
- Important to open and review all results
- "Group" option will place like tests together for easy comparison
- Display option is your own personal choice
- Will stay with choice selected until you change it
- Right click on Micro result and select 'View Details" to see drug susceptibilities if appropriate
