

Long Term Care and Acute Care

Partner In Care/Visitor Respiratory Illness Screening Questions

Please ask all Partner in Care/Visitors the following question

Do you have any symptoms of respiratory illness?

Fever, chills

Cough (new or worsening)

Sore throat

Runny nose, sneezing or congestion

Shortness of breath or difficulty breathing

Marked or unusual fatigue

Muscle/body aches

Headache

Acute loss of sense of smell or taste

If the visitor answered “Yes” to any symptoms, they will NOT be permitted to visit.

Compassionate requests should be accommodated at the discretion of the facility leadership. Compassionate visitors should have a negative test result prior to entering and visitor must remain in full personal protective equipment while in the facility. If a compassionate visitor tests positive, entry to facility is only permitted in exceptional circumstances.

Partners in Care and visitors are no longer required to mask within our healthcare facilities. If they ask for a mask, please provide them a mask.
