

The 10 Rights of Medication Administration

Practicing the **10 Rights of Medication Administration** promotes safe administration of medications, prevents incidents and harm and supports safe patient/client/resident care.

The 10 Rights of Medication Administration are:

1. Right client
2. Right dose
3. Right medication
4. Right route
5. Right time and frequency
6. Right education
7. Right to refuse
8. Right assessment/reason
9. Right evaluation
10. Right documentation

See **Health PEI's Medication Administration Policy** for the 10 Rights of Medication Administration procedures located on the Health PEI policy website:
