

Health PEI Approved Cleaners

Infection Prevention and Control review and approve cleaning and disinfecting products to ensure they meet national healthcare standards.

Oxivir / Oxivir TB

(most commonly used product)

Rescue

(To be used with diarrheal illness / *C.difficile*)

Cavi Wipes

(Only Approved for Dialysis and Public Health Dental equipment)

Key Staff Reminders:

- Follow contact time and dilution instructions. **Contact Time** is the amount of required time a cleaning and disinfecting product must have contact with a surface to effectively kill germs.
- Do not substitute personal or household products. (i.e. Lysol)
- Wear gloves when using ready-to-use wipes.
- If equipment requires a specific cleaning and disinfecting product either not listed or has not been approved by IPAC, please contact your local ICP for support.
