

Project CRADLE Timeline

Project CRADLE will be rolled out in a phased approach starting in 2025 and starting with all 9 public homes as shown in the timeline below. Project CRADLE will roll out in select private homes starting in October 2025.

★ = When electronic charting will go live in each home

The order of implementing in public homes was decided in collaboration with PEI's LTC Leadership Team based on the following factors:

- ✓ Balancing implementations across the east and west end of the island
- ✓ Starting with one of the largest and most complex homes
- ✓ Implementing in older homes later in the process to ensure technology infrastructure is ready
