

SAFETY TALK

Fire Prevention Week: Charge Into Fire Safety

This year's Fire Prevention Week™ (FPW™) campaign, October 5-11, "Charge into Fire Safety™: Lithium-Ion Batteries in Your Home," works to educate everyone about using these batteries safely. Most of the electronics we use in our homes every day are powered by lithium-ion batteries. In fact, most everything that's rechargeable uses this kind of battery. The campaign stresses how important it is to BUY, CHARGE, and RECYCLE safely when it comes to lithium-ion batteries.

Lithium-Ion Batteries in Your Home

Lithium-Ion Batteries store a lot of energy in a small place. These batteries can overhear, start a fire, or explode if overcharged or damaged. By learning how to BUY, CHARGE, and RECYCLE these batteries, you can help prevent a fire in your home.

BUY only listed products.

CHARGE devices safely. Always use the cables that come with the product to charge.

CHARGE your device on a hard surface.

STOP using your device right away if the battery smells, gets too hot, makes popping noises, or changes colour or shape.

RECYCLE batteries responsibly. Do not throw lithium-ion batteries in the trash or regular recycling bin.

RECYCLE your device or battery at a safe battery recycling location.
