

Project CRADLE

Care Planning, Reporting, Assessments, and Documentation for Long-term Efficiency.

Nov 20, 2025

Dear PEI Long-Term Care Staff and Community,

I am thrilled to announce that over the past few weeks, another five public long-term care homes have successfully transitioned to electronic charting. Riverview Manor, Colville Manor, Stewart Memorial Home, Margaret Stewart Ellis Home, and Maplewood Manor have now transitioned to electronic charting as of November 13. We would like to thank the hard-working LTC staff members across the province and in these homes. This success was a direct result of their dedication and resilience.

Notably, I would like to celebrate a few key individuals who went above and beyond during this transition:

- **The Wave 2 Homes' Superusers:** The Superusers across wave 2 homes played a pivotal role in supporting their peers throughout the implementation of PointClickCare. They were instrumental in data entry, training other staff members, and offering support during the early implementation of the software.
- **The Wave 2 Homes' Schedulers:** We would like to thank Katelyn MacDonald, Rachel Beaudoin, Sandra Williams, Karen Somers, Barb Dugay, and Terra Lynn Shea. Their hard work ensured that each staff member across all five homes received training and were supported by Superusers after go-live.
- **The Wave 2 Homes' Leadership:** The flexibility and support offered by each leader in our Wave 2 homes allowed for a smooth implementation process. We would like to thank them for their support during the Wave 2 implementation of PointClickCare.

The Wave 2 homes will continue to be supported by onsite support staff as they continue to use the software. We will now begin to focus our efforts on the implementations of electronic charting within our wave 3 homes and continue to provide updates on this in the months to come.

Thank you for your continued dedication to improving resident care,

Trevor Waugh
