

Subject: Changes to Pharmacy Participation in PrescribeIT® in PEI

We are writing to inform you of an important update regarding pharmacies in Prince Edward Island participating in PrescribeIT® e-prescribing service. PrescribeIT® allows prescribers to electronically send prescriptions directly from their electronic medical record (EMR) to the pharmacy management system chosen by the patient. This secure process eliminates the need for paper prescriptions, reduces the risk of lost faxes, and enhances patient safety.

Effective January 1, 2025, a transaction fee was introduced for pharmacies using PrescribeIT® to process e-prescriptions. While many pharmacies in PEI have chosen to continue their participation, some have opted to withdraw from the program. This decision was made independently by these pharmacies and may affect your ability to send electronic prescriptions to certain locations.

To help you navigate these changes, a list of non-participating and participating pharmacies is available below. We encourage you to review this list to identify any pharmacies you or your patients rely on that will no longer support PrescribeIT® transactions. Pharmacies actively participating in PrescribeIT® will continue to be identified by the eRx icon in your EMR as usual.

What does this mean for your practice?

- You can continue to e-prescribe seamlessly to pharmacies that remain in the program.
- For pharmacies that are no longer participating, prescriptions will need to be processed using other methods, such as fax or paper.

Supporting You and Your Patients

We are committed to ensuring a smooth transition and to supporting you in maintaining continuity of care.

If you have questions or need support, please contact the PrescribeIT® team at PrescribeIT@infoway-inforoute.ca.
