

## *Accreditation*

**Accreditation is a voluntary method of quality assurance. Accreditation Canada provides our hospital with an external peer review process which we use to improve the services that we provide to our patients based on standards of excellence.**

**The surveyors from Accreditation Canada will be coming to talk to us about the services we provide from (September 25 - 29<sup>th</sup>, 2017).**

**Accreditation Canada is using a process called Qmentum which is a combination of the words "Quality and Momentum" and focuses more on staff, physician, and volunteer involvement.**

**If you have any questions about this process please contact a member of the Quality Team**
