

## Infection Control

Infection Control is a very important part of the Accreditation Canada Standards.

One of the questions you may be asked when the surveyors are at our facility (September 25 - 29<sup>th</sup>, 2017) is:

**“When do you wash your hands with soap and water?”**

To prevent infection we know we wash our hands with soap and water when visibly soiled otherwise use alcohol based hand rub before and after patient care.

If you have any questions or concerns please contact your Infection Control Nurse.
