

Work-up of Suspected Primary Lung Cancer

The Lung Cancer Diagnosis Pathway

This path is a resource to healthcare providers, health system partners and the public to support steps and decision making on clinical care from presentation of initial symptoms through to diagnosis and treatment within the PEI health system. The establishment of target timelines, lung cancer diagnosis pathway and ongoing monitoring has been developed and advised by the Lung Cancer Action Group under the direction of the Provincial Cancer Coordination Steering Committee.

For more information or inquiries please contact the Provincial Cancer Coordinator at 902-368-6714
