Stroke Distinction: Did You Know?

Patient/ Client and Family Education (Part 2) Resources

Canadian Stroke Best Practice Recommendations for Transitions and Community Participation Following Stroke outlines the best practice recommendations for patient and family education which include sections:

- Assessment of Learning Needs
- Delivery of Education – individualized, multi-modal and *accessible resources*
- Supporting Self-Management Following Stroke through Skills Training

Enhance client experience and improve outcomes

Mitigate risk and increase efficiency

Improve teamwork and communication

AT HEALTH PEI: Survey Visit October 31-Nov 3

The HPEI Staff Resource Centre PEI Organized Stroke Program Information page has recently added a new tab “Patient and Family Education”.

This tab takes staff to accessible resources to use when delivering education to patients and families. Sections include: *General Stroke Information, Secondary Stroke Prevention, Living with Stroke, Community Resources and Participation, and Additional Helpful Websites.*

Please note: Resources appearing in black text, without a hyperlink, are in process

Questions Accreditation Canada Surveyors May Ask Staff:

1. Where do you find resources to support patient education in various languages?
2. What checklists or tools do you use to support patient education?
