

Accreditation: ROP of the Week

Required Organizational Practice: Patient Safety Quarterly Reports

WHAT ARE PATIENT SAFETY QUARTERLY REPORTS?

- The governing body is provided with quarterly reports on patient safety that include recommended actions arising out of patient safety incident analysis, as well as improvements that were made.

AT HEALTH PEI:

- The Quality, Risk and Patient Safety Division **prepares and presents a patient safety report** to the Quality and Safety Subcommittee of the Board **on a quarterly basis**.
- These quarterly patient safety reports include information on:
 - current trends related to patient safety incidents occurring at Health PEI, such as falls, medication, and behavioural incidents;
 - all critical, severe and Never Events (as outlined by Canadian Patient Safety Institute);
 - actions and recommendations identified to mitigate risk of re-occurrence and promote safety.

Quarterly patient safety reports are provided to the Quality and Safety Subcommittee of the Health PEI Board

The reports outline specific organizational activities and accomplishments to support Health PEI's patient safety goals and objectives

The Health PEI Board supports patient safety activities and accomplishments and acts on recommended actions outlined in patient safety reports
