---

## **UPCOMING EVENTS**

**There are no upcoming events in CIS.**

## PowerChart Update:

### Medication Administration times to be adjusted for the following (subcutaneous) anticoagulants:

Heparin q12h timed will be changed from 1000/2200 to 0900/2100

Fondaparinux (Arixtra) q24h timed will be changed from 1000 to 0900

Dalteparin (Fragmin) q24h timed will be changed from 1000 to 0900, and q12h timed from 1000/2200 to 0900/2100

Enoxaparin (Lovenox) q24h timed will be changed from 1000 to 0900, and q12h timed from 1000/2200 to 0900/2100

### New Proning Patient - as per protocol order for QEH & PCH

Details for **Proning Patient as per protocol**

Details | Order Comments

Start Date/Time: 2021-Jan-18 1353

Intubated:  Yes  No

Instructions: 16 hours prone, 8 hours supine unless otherwise specified by Provider.

### Reminder:

To Consult Rehabilitation Medicine Specialists (aka 'physiatrist'), please do not use the 'Consult Physician' order. The correct order for this service is the **Consult Rehabilitation Medicine** order. An easy way to search is to enter 'consult reh' and the correct order will populate.

The Rehabilitation Medicine Specialists use a multi-patient task list to organize their patients. They will not have the patient populate to their list if ordered through the general 'Consult Physician' order.

Continue to call when you have a patient in need of this service. If your patient is not seen in one or two days, please call the Rehabilitation Medicine Department.

## Lab Update:

To reflect changes in Laboratory testing:

- **eGFR-MDRD** orderable is being removed and is being replaced by **eGFR(CKD-EPI)**

### Before Change:

This test is generally reflex ordered on Creatinine samples, although previously CPOE orders were found searching under “eGFR-MDRD”, “GFR” or “Glomerular Filtration Rate”.
