The following solution areas have updates:

PowerChart, FirstNet & SurgiNet - Pages 2 - 3

Electronic Medication Request (QRG) - Pages 4 - 5

UPCOMING EVENTS

There are no upcoming events in CIS

Privacy Matters Corner…

Protecting the privacy of patient information is often discussed but do we stop and think about all of the physical safeguards we need to have in place? When you are accessing patient information it is important to think about the environment you are in and what you need to do to protect information. Some things to think about are;

- Is my screen visible to others?
- Am I in a public location where it is possible for someone to see my screen or possibly my password?
- Is it safe to leave my computer in this location? (ie. doors locked, not visible, etc)
- Am I on a secure network?

There are many things to consider in order to keep information safe!

PowerChart/FirstNet/SurgiNet Updates:

Pharmacy Patient Monitor (for Pharmacy ONLY) - The Pharmacy Patient Monitor (PPM) is a view in PowerChart available to Pharmacist, Pharmacy Technician and Pharmacy Student users.

The PPM displays patients who have orders that need pharmacy interaction, such as orders needing Verification or Medication Request processing. At the current time, pharmacy staff will be using the PPM to monitor and support electronic med requests sent from nursing for inpatient, non-wardstock medication orders.

Training documentation has been provided to Health PEI pharmacy staff

# PowerChart/FirstNet/SurgiNet Updates: (continued)

NEW: Electronic Medication Request

Nursing may request patient medications in powerchart via two workflows. Quick Reference Guides will be provided by the Clinical Educators.

1. The Med Request MPage link can be found on the Menu at the bottom of the list and via the Chart drop down on the top toolbar

2. Directly from the eMAR

Health PEI
CLINICAL INFORMATION SYSTEMS
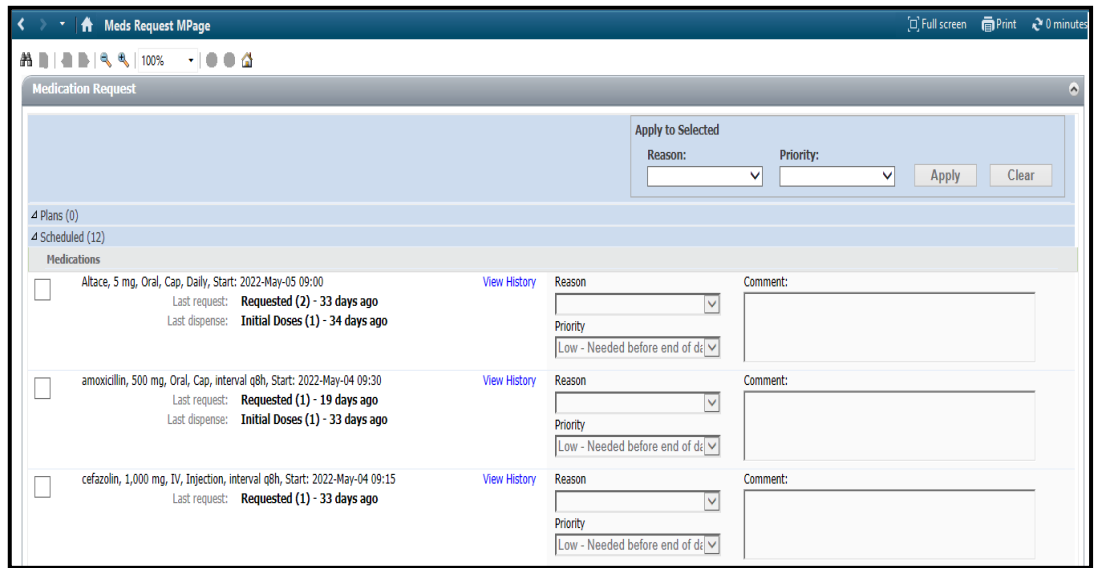

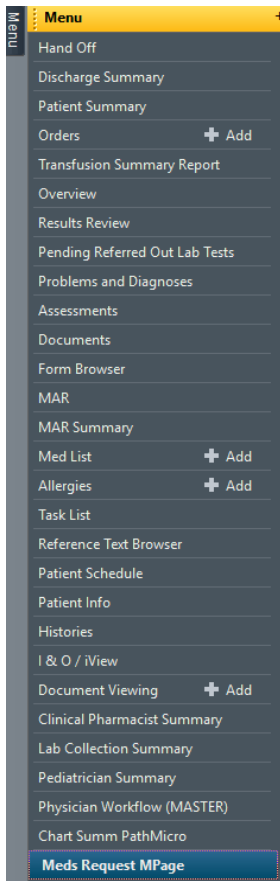

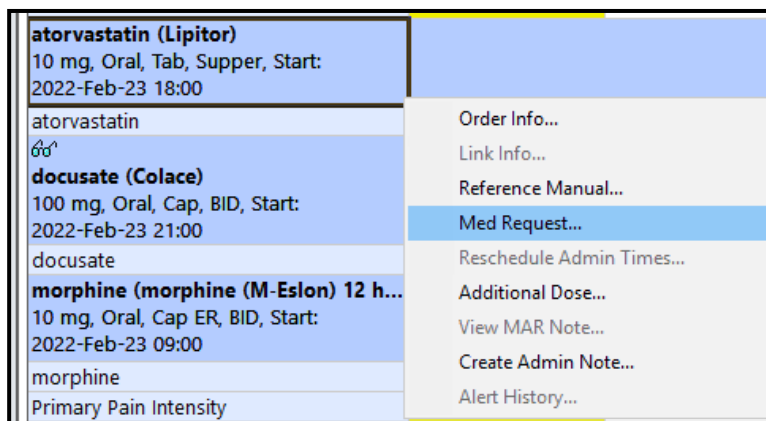

Quick Reference Guide - Electronic Medication Request

- The Medication Request MPage is replacing the paper Pharmacy Action form that is presently faxed to Pharmacy when medications are needed.

Nursing Workflow via eMAR

- The nurse will complete the med request action by right clicking on the order within the MAR and selecting the Med Request... option
- The Med Request window will then show with 3 fields to be completed by the requestor.
    - Reason
    - Priority
    - Comments (to be completed as appropriate)
- Face-up in this view is the Last dispense time and Last request status
- Within this window, you can also view the med request history for that order.
- Once the reason and priority fields are completed, the user can submit the medication request.
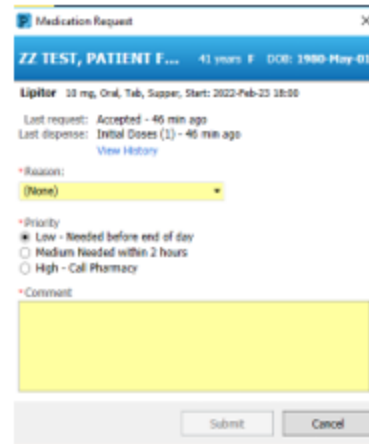

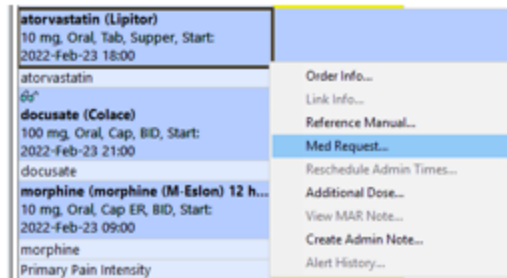

If requesting more than 2 medications, it is more efficient to use the Medication Request MPage

Nursing Workflow via Med Request MPage tab

- **This page DOES NOT auto-refresh at any point!.**
- The Med Request MPage link can be found on the Menu at the bottom of the list
   and via the Chart drop down on the top address bar
- The Med Request MPage is sectioned off similarly to the eMAR (Scheduled, Unscheduled, PRN, Continuous).

Quick Reference Guide - Electronic Medication Request

- If you hover over an order, you can see more details
- If an order has not been verified, it will display in a darker gray with the verification icon
- View History shows the **Med Request History** for that order including status of request, who dispensed the med, request reason, priority and time of request.
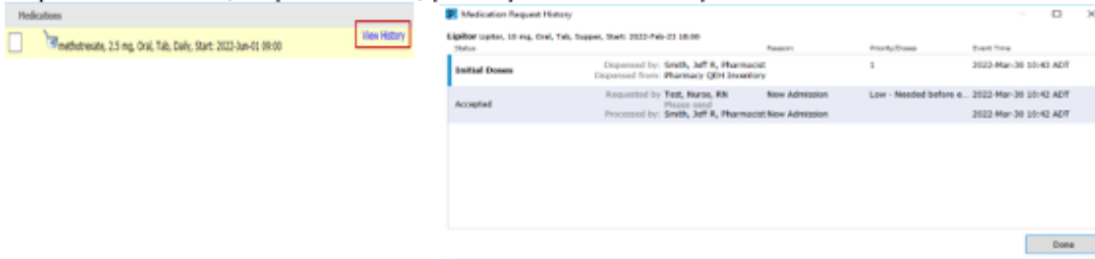

- To complete a Med Request in the MPage, selected the order by checking off the box to the left.

After the order is selected you can choose a reason, priority, and leave a comment

- Multiselecting the meds with a check mark enables you to make multiple refill requests.

- "Apply to Selected" with a Reason and Priority drop down enables you to choose a reason and priority to apply to all selected orders, complete and click apply.
- Add comments manually as appropriate

- Clear will reset selected reasons and priority options.
- To compete click Submit [Submit] at the bottom right of the page.
