WEEK OF - SEPT 25TH 2023

The following solution areas have updates:

Order Sets - Page 2

PowerChart, FirstNet & SurgiNet - Pages 2 - 3

UPCOMING EVENTS

Privacy Matters Corner...

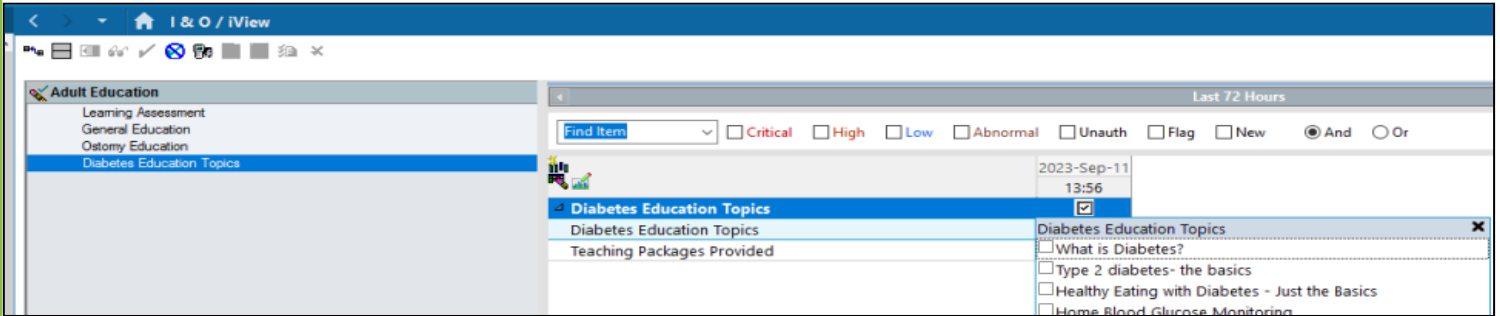

Did you know that Health PEI has a policy for Client Identification? You may think it only applies when you are providing direct care, BUT something as simple as properly checking identification can protect us all in so many ways. By using proper patient identifiers when opening, accessing, recording in, printing, mailing, sending or editing patient documents and charts you can help to prevent things like privacy breaches, documentation errors and even care related errors in the future. Something so simple and easy can protect us from so much. Please take the time to ensure that you are checking your client identification every time, prior to opening the patient's chart.

Order Sets:

New Order Set - Antibiotic Lock Order Set

iView Updates - Revision to the Education documentation:

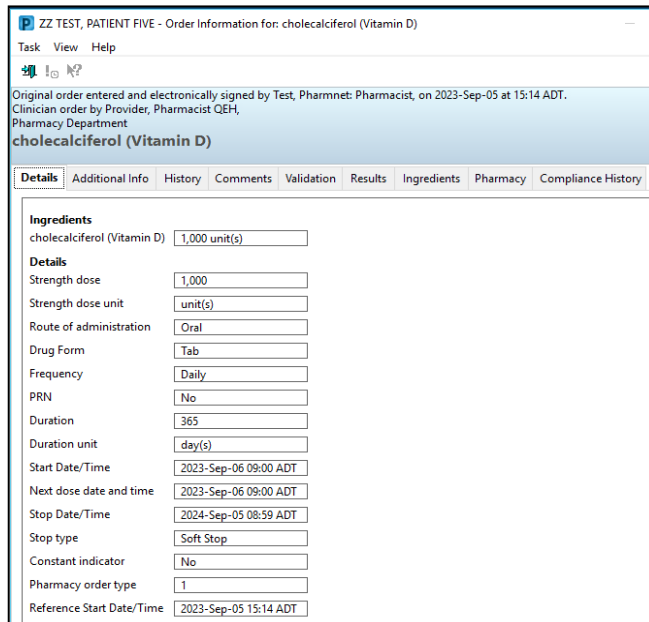

PowerChart, FirstNet & SurgiNet Updates:

New Note Type - Pharmacist Ordering Progress Note (Go-Live date: Week of October 23, 2023)

To support Pharmacists' expanded scope of practice, this new policy allows Pharmacists to prescribe and adjust medication orders as well as order tests for patients without a Physician's or NP's order.

When these orders are entered in CIS, the Pharmacist will select the "Provider, Pharmacist" as the ordering clinician. The Pharmacist's name will also be visible on the order.

(continued next page)

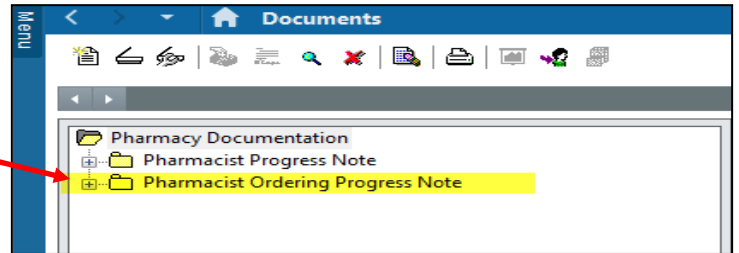

PowerChart, FirstNet & SurgiNet Updates: (continued)

As part of the policy, the Pharmacist is also required to communicate with the most responsible care provider and document all relevant patient information in the patient's chart.

The Pharmacist will document in the Health Record using the note title "Pharmacist Ordering" for all interventions related to this policy.

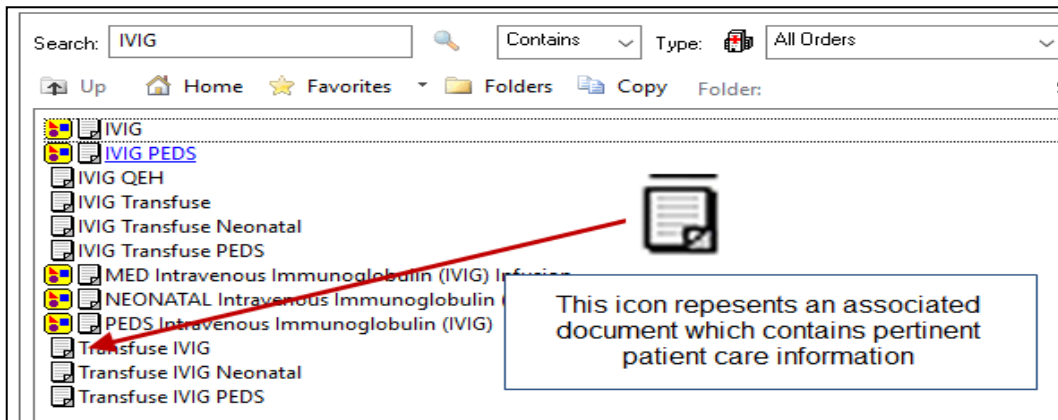

The pharmacist will also forward the documentation to the most responsible health care provider indicated in the patient Health Record.

It will be located under Pharmacy Documentation folder on the Documents Tab

REMINDER: Associated Documents can be found on powerplans or on single orders. These documents contain pertinent patient care information and can be printed if required. **IVIG information is one**

example

Reference documents can also be accessed by right clicking on the plan on the orders page OR from the Reference Text Browser using the search window.
