In Progress

5. The “**Performed by**” box is defaulted to the clinician logged on. Please verify the name is correct.
6. In the “**Bag #**” box, the system defaults to the appropriate bag number. If necessary, the number may be modified.
7. The “**Site**” is a required field for the initial Begin Bag event. In the Site box, click the drop down arrow to select the IV insertion site from the list.
8. In the “**Volume (mL)**” box, the volume entered on the order is defaulted by the system. If infusing a different amount, enter it here.
9. In the “**Rate (ml/hr)**” box, the infusion rate is defaulted by the system to the rate entered on the order.
10. To enter a **Comment** relating to the IV event, click “**Comment**” to open the dialog box.
11. Enter a comment and click “**OK**”. If a comment is entered, an asterisk is displayed next to the IV event.
12. Click “**Apply**” to save entries.
13. The results will display on the appropriate line in the date and time column of the history summary.

14. Click the green check mark ✓ on the toolbar to sign the new or modified results and return to the MAR.
