

Medication Administration Record (MAR)

Identifying Icons in the MAR

	<p>Renewal: Orders that reach their soft stop need to be renewed or discontinued.</p> <p>Soft stop means orders are not discontinued automatically. Hard stop means orders are automatically discontinued</p>
	<p>Nurse Review: Indicates that nurse review of the order is required.</p>
	<p>Admin Note: Indicates that there is a nurse-to-nurse communication attached to the order.</p> <p>For example, "Do not allow patient to chew medication".</p>
	<p>Pharmacy Comment: Indicates that there is a pharmacy comment attached to the order</p>
	<p>STAT Priority: This icon will displayed when there is a task that has a priority of STAT</p>
	<p>Request Pharmacy Verification: The medication order has not been verified by pharmacy.</p>
	<p>Rejected by Pharmacy: Indicates the order has been rejected by pharmacy. Check all order information before administering.</p>
	<p>Taper: Indicates the order is part of a medication taper</p>
	<p>Powerplan : Indicates the order is part of a Powerplan</p>
	<p>Yellow Delta: Indicates that modifications have been made to a scheduled order.</p>

	It displays above the first dose to be administered after the date and time of the order modification.
	Overdue Alarm Clock: Indicates that a medication administration is overdue. It displays next to the date/time bar and in the Medication section window
	Folders: Displays in the MAR charting window. If an order has been modified (ie: rate changed), the user can select which version of the order they would like to chart against by single clicking this icon.
	Push Pin: Displays in the MAR IV charting window to the left of the comment button if a comment is present.
	IV Event Modification: A piece of paper with a red X indicates that the IV event has been modified. This indicator applies to the whole event (begin bag, infuse, bolus, rate change), not just the performed date and time.
	IV Event Modification with Comment: A piece of paper with a red X and a pushpin indicates that the event has been modified and has a comment.
	Action pending before task is completed
