

Documentation Unique to FirstNet:

On the triage form **Reason for Visit** is Added under New Diagnoses:

If you right click in the white field under Diagnosis and click 'Add Diagnosis', the Diagnosis Search window opens:

The screenshot shows the 'ED Adult Triage Assessment - ZZ TEST, PATIENT EIGHT' window. The 'Reason for Visit' section is active, displaying a table of diagnoses. The 'Diagnosis' field is highlighted with a red circle. Below it, a 'Diagnosis Search' window is open, showing a list of folders including 'ED Reason for Visit', which is also highlighted with a red circle. The 'ED Reason for Visit' folder is selected, and its contents are displayed in a list below.

Clinical Dx	Date	Dx Type	Code
HA - Headache	2012-Oct-09	Reason For Visit	CF65BD3A-CB21-44D3-842...

Diagnosis Search window:

- Up
- Home
- Favorites
- Folders
- Previous Diagnosis
- Folder: Folders

- Re-evaluation
- General Medical
- Cardiorespiratory
- Toxicology
- ED Reason for Visit
- Infection

1. Expand and select from category folders and ED Reason for Visit folder by clicking on the folder icon.
2. Double-click to select appropriate RFV from drop down list.
3. RFV populates to scratch pad at bottom of window. Click OK
4. When selecting the RFV, the Triage Nurses must select Subset and PNED in order to have the RFV populate to PNED.
