

Results Review

Results Review tab is a view only for reference. This tab you cannot document in.

Clinical Range - Each of the Tabs have different defaults set for clinical ranges. To change the clinical range, right-click the grey field and adjust the date back.

There are 10 sub tabs:

1. Recent Results –summary of all results from Vitals, Labs and DI –clinical range of 5 days
2. Vitals---separated out clinical range of 7 days
3. Lab results---clinical range of 7 days. Clicking on the result, will show the normal high and normal low range.
4. Diagnostic Imaging—only able to view printed reports. Clinical range 3 years
5. Warfarin work sheet- clinical range of 10 days will pull in INR and Dosage information documented electronically on the Medication Administration Record
6. COPD Pathway—assessments on patients with COPD
7. Shift summary - Is a brief summary of the patient during a shift.
8. Rehab – Used specifically for this service.
9. Diabetes Management – will display a list of the patient’s blood glucose. It will also show if the patient had a high or low and what was done for that incident.
10. Microbiology Viewer will display the current antibiotics the patient is currently taking while in hospital.
