

LTC High Risk Behavior Alert

- Upon move in or when the resident status changes, the RN/LPN will complete the resident's Long-Term Care Violence Assessment tool (LTC VAT)
- If resident is experiencing any responsive behaviors:
 - (a) Refer to Nursing Care Pathway for Responsive Behaviors for appropriate interventions.
 - (b) Update care plan with appropriate interventions.
- If resident is high risk (>3) as per LTC VAT:
 - (a) Flag with an orange dot on the MAR (dot should be on the picture) and the spine of the chart.
 - (b) Review the care plan and/or immediate needs plan for any new strategies.
 - (c) Identify on the care plan and/or immediate needs plan if there is a safety plan developed.
 - (d) If a safety plan has been developed, review any additional actions.
 - (e) If you have any questions, reach out to your CRN or manager.
